DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

1. TITLE	2. IDENTIFICATION NUMBER
EAM CARDS FOR ENGINEERING DOCUMENTATION	DI-CMAN- 81019

3. DESCRIPTION/PURPOSE

3.1 EAM Accounting Cards are used by the Government to record each engineering document affected by an engineering change, deviation, or waiver.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
890927	C/T2137		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 When EAM cards are required for each document of engineering documentation affected by a change, this data item will be used in conjunction with one or more of the following DIDs, as appropriates:

(Continued on Page 2)

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
	Standard 80-80 card	G4835

PREPARATION INSTRUCTIONS

10.1 Format: The EAM card(s) shall be standard 80-80 keypunched cards.

10.2 Content:

10.2.1. Column 1. Enter 1.

10.2.2. Column 2. Leave blank.

10.2.3. Columns 3 through 10. Enter the number of the document which would be affected by the change (Example: If the document change is the drawing (ON123456), then enter ON123456; if the document being change is an IPC tape (ON123456), then enter ON123456; if the document being changed is an NSA Specification (NSA 72-24), then enter NSA72-24; if the document being changed is the Military Specification (MIL-S-47543), then enter the document number reduced to eight characters, such as (MS-47543).

10.2.4. Column 11. Leave blank.

*10.2.5. Columns 12 and 13.

(1) If the graphics or IPC tape is being changed (i.e., a "G" or a "T" or a "C" is entered in Column 29), then enter the proposed revision level of the graphics or IPC tape.

(Continued on Page 2)

DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release, distribution is unlimited.

Check the source to verify that this is the current version before use.

Application/Interrelationship (Continued)

a. DI-CMAN-80644 Engineering Change Proposal (Short Form)

b. DI-CMAN-80639 Engineering Change Proposal (Long Form)

c. DI-CMAN-80640 Request for Deviation

d. DI-CMAN-80641 Request for Waiver

.3 This DID supersedes DI-E-5383C

Preparation Instructions (Continued)

(2) If the parts lists only is being changed (i.e., a "P" is entered in column 29), then enter the graphics revision Level that is compatible with the new parts list revision level. (Note: If there is a partner graphics change corresponding with this parts list change, this field will contain the proposed graphics revision level of the partner graphics change.)

(3) If this change is creating a graphics drawing or an IPC tape, enter "++".

(4) If this change terminates the graphics of a drawing or an IPC tape, then enter "gg".

(5) If this change is a deviation or a waiver, then enter the current graphics or IPC tape revision level.

(6) If the document number is not a ON number, leave blank.

10.2.6. Column 14. Leave blank.

*10.2.7. Columns 15 and 16.

Note: If the document number is a ON number, then blanks in graphics revision level (parts list revision level) means that the revision level of the graphics (parts list) is BLANK.

(1) If the parts list revision level is being changed (i.e., a "P" or a "C" is entered in Column 29), then enter the proposed revision level of the parts list.

(2) If the graphics only is being changed (i.e., a "C" is entered in Column 29) and the drawing is an assembly, then enter the parts list revision level that is compatible with the new graphics revision level. (Note: If there is a partner parts list change corresponding with this graphics change, this field will contain the proposed parts list revision level of the partner parts list change.)

(3) If the graphics only is being changed (i.e., a "C" is entered in Column 29) and the drawing is not an assembly, then enter "++".

(4) If the IPC tape is being changed (i.e., a "T" in Column 29), then enter "++".

Check the source to verify that this is the current version before use.

10. Preparation Instructions (Continued)

(5) If this change is creating a parts list for a drawing, then enter "**".

(6) If this change terminates the parts list for a drawing, then enter "99".

(7) If this change is a deviation or a waiver, then enter the current parts list revision level.

(8) If the document number is not a ON number, leave blank.

10.2.8. Column 17. Leave blank.

10.2.9. Columns 18 through 27. Enter the change document number of this change. If the change is a waiver or a deviation, then this field should be at least five columns long (Example: W0005).

10.2.10. Column 28. Leave blank.

10.2.11. Column 29. Enter "D", if deviation; "W", if waiver; "P", if only parts list is changed; "G", if only graphics is changed; "C", if both the parts list and the graphics ar changed; or "T", if the IPC tape is changed.

10.2.12. Column 30. Leave blank.

10.2.13. Columns 31 through 36. Enter the two digit number for the year of the contract and the last four digits of the number of the contract under which this data is being prepared (Example: 850123).

10.2.14. Column 37. Leave blank.

**10.2.15. Columns 38 through 44. Enter ECP number; leave blank if no ECP.

10.2.16. Column 45. Leave blank.

10.2.17. Column 46. Enter a "K" if the contractor holds the master drawing, otherwise enter a "G". (Enter a "G" in Column 46 for all deviations and waivers).

**Note: When Columns 38-44 are used, enter a "3" in Column 80 if the change involv cost or enter a "1" in Column 80 if no cost is involved.

10.2.18. Column 47. Leave blank.

10.2.19. Column 48. Enter one of the following for the classification of the drawing: "U"-Unclassified; "C"-Confidential; "S"-Secret.

10.2.20. Column 49. Leave blank.

10.2.21. Columns 50 through 59. When the contractor elects to use two change documents for a related engineering change (one for parts and one for graphics), then the associate contractor's internal change document number shall be entered in this field, otherwise, leave blank. Example: If this card corresponds to the graphics change document, then th ield will contain the partner change document number for this parts list.

10.2.22. Column 60. Leave blank.

). Preparation Instructions (Continued)

10.2.23. Columns 61 through 79. (Affected Sheet Numbers)

(1) When Column 29 is a "C" or "C":

(a) Column 61. Enter "1"

(b) Column 62. Leave blank.

(c) Columns 63 through 79. Enter the remaining sheet numbers affected by the engineering change, separated by one blank (i.e., 2 3 7 11).

(2) When Column 29 is a "P":

Enter "1" in Column 61, followed by a blank and then a Z (zee). This applies to all parts lists changes.

(3) When Column 29 is a "T", "D", or "W":

Leave Columns 61-79 blank.

Note: To continue the entering of affected sheets on another EAM card, the last entry should be an asterisk "" preceded by a blank, (i.e., 2 3 7 11 *). Do not separate double digit sheet numbers from one card to the next. And do not use Column 80.

**Note: To end the entering of affected sheet numbers, enter a "Z" (Zee), preceded by a blank. This indicates the end of the affected sheet numbers.

).3. If there is not enough space in width of card 1 to enter all information, then generate he following card (more than once if necessary) to enter all information.

10.3.1. Columns 1 through 8. Enter document number.

10.3.2. Column 9. Leave blank.

10.3.3. Columns 10 and 11. Same as Card 1, Columns 12 and 13.

10.3.4. Column 12. Leave blank.

10.3.5. Columns 13 and 14. Same as Card 1, Columns 15 and 16.

10.3.6. Column 15. Leave blank.

10.3.7. Columns 16 through 80. Enter sheet numbers affected by the engineering change, separated by one blank as in Card 1, Columns 63 through 79.
