DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

1. TITLE
ASTER EQUIPMENT SCHEDULES AND ALLOCATIONS (MESA) DOCUMENT

2. IDENTIFICATION NUMBER
DI-MGMT-81017A

3. DESCRIPTION / PURPOSE

3.1 The MESA Document is a vehicle for initiating, maintaining, and documenting in the MESA data base (program documents 60-59, 60-59X, 60-59S, and 60-59R) all actions related to the establishment of equipment requirements and is a vehicle for tracking, controlling and allocating hardware in support of program requirements.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b GIDEP APPLICABLE
900208	F/HQ BSD/PKXD		

7. APPLICATION / INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for the data product generated by the specific and discrete task requirements as delineated in the contract.

7.2 This DID supersedes DI-MGMT-81017.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b AMSC NUMBER
		F4886

PREPARATION INSTRUCTIONS

10.1 Content and Format Requirements. The document entries shall be as specified below:

	Data Element	Definition	Input By
1	CI Number or Part ID Number	(17 Characters) Contains the BSD assigned CI number in the left seven character positions. In cases where a BSD CI number is not assigned, another number selected by the equipment supplier may occupy this position. In either case, additional characters may be appended to the basic number to distinguish deliverable components, part kits, etc. This number is the primary key to the data base.	Supplier
2	Additional ID	(2 lines by 17 Characters) A pair of fields into which cross reference identifiers of equipment may be placed. No more than one identifier should be placed in each field.	Supplier

(continued on Page 2)

DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Block 10, Preparation Instructions (Continued)

	Data Element	Definition	Input By
3	Volume	(4 Characters) Associated with a particular contractor or major system/component of the ICBM Program. Some contractors may have several Volume identifiers. The Volume identifier is used to separate data for management purposes and printed reports. The first position indicates with which program the volume is associated (B - Minuteman; M - Peacekeeper; S - Small ICBM; R - Rail Garrison).	Supplier
4	Supplying Contractor	(3 Characters) Identifies the contractor originally supplying the equipment.	Computer Generated
5	Equipment Type	(4 Characters) Identifies the type of equipment.	Supplier
6	Part Number (Base)	(19 Characters) The part number is complete in this data element if serialized units of the equipment will all have identical part numbers. If the part number contains a suffix which identifies different configurations of the equipment, the suffix is placed in the Part Dash field.	Supplier
7	National Stock Number	(19 Characters) When the equipment is supplied to USAF documentation, the National Stock Number is entered.	Supplier
8	Nomenclature	(3 lines by 41 Characters) Nomenclature identifying the equipment, to be consistent with the "BSD Configuration Item Accountability Report".	Supplier
9	Model	(7 Characters) Identifies the program model to which the equipment applies.	Computer Generated (Unprotected)
10	Line Code	(4 Characters) A value assigned by the MESA system to key the line entries representing distinct equipment requirements.	Computer Generated
11	Quantity	(3 Characters) For reallocations of equipment the field contains a zero. In all other cases Quantity will be 1 per line.	User

ock 10. Preparation Instructions (Continued)

	Data Element	Definition	Input By
12	User Project Element Code	(3 Characters) The BSD code identifying the project officer for the contract of the equipment user.	User
13	User Contract	(6 Characters) The dash number (without the dash) of the contract on which the equipment is being used, prefixed by the last two digits of the contract year.	User
14	Using Contractor (User)	(3 Characters) The contractor or agency who requires the equipment.	User
15	Destination	(4 Characters) A coded identification of the contractor or USAF base to which the equipment is to be shipped.	User
16	Location	(6 Digits) A coded identification of the specific building or area to which the equipment is to be shipped within the contractor or USAF base destination.	User
17	Event	(10 Digits) A coded identification of the event for which the equipment is required.	User
18	Need Date	(7 Characters) The date equipment is required by the user at the user destination (e.g., 850907 = 1985 September 7).	User
19	Capability Date	(7 Characters) The date the equipment supplier will be able to ship the equipment. If possible the capability date should be entered within 30 days of status I. (see data element 29, "Status").	Supplier
20	Contract FOB or Required Contract	(9 Characters) The date by which the supplier is contractually obligated to ship the equipment; if followed by "-R," the date by which a contract go-ahead is required to meet the stated Capability Date.	Supplier
21	Ship Date	(7 Characters) The actual date on which the equipment is shipped by the supplier, to be entered within seven (7) days of date of shipment.	Supplier
22	Shipper Number	(9 Characters) A number associated with the shipment of the equipment; typically the DD 250 number.	Supplier

Block 10, Preparation Instructions (Continued)

	Data Element	Definition	Input By
23	Reallocate From	(6 Characters) In equipment reallocations, refers to another line code which contains data on the prior usage of the equipment. The line code is prefixed with the contractor code of the user identified in the referenced line.	User or Supplier
24	Reallocate To	(6 Characters) In equipment reallocations, identifies another line code which contains data on the next usage of the equipment. The line code is prefixed with the contractor code of the user identified in the referenced line.	Computer Generated
25	Supplier Project Element Code	(3 Characters) The BSD code identifying the project officer for the contract of the equipment supplier.	Supplier
26	Supplier Contract	(6 Characters) The dash number (without the dash) of the contract on which the equipment is being supplied, prefixed with the last two digits of the contract year.	Supplier
27	Part Dash	(4 Characters) The part number dash suffix (without the dash) where the suffix identifies different configurations of the equipment.	Supplier/ User
28	Serial Number	(7 Characters) The serial number of the equipment.	Supplier
29	Status	(1 Character) Code field having one of the following values: P (planning - no commitment); I (requirement validated by BSD PO for user); C (supplier's established capability date and other supplier data entered); V (requirement approved by BSD CAR Board to be put on user and supplier contracts); A (equipment on user and supplier contracts); R (reallocation of existing equipment).	Supplier/ User/Data Control
30	Remarks	(4 lines by 73 Digits) Repeating fields containing comments associated with a line record.	User/ Supplier
31	CLIN	(7 Characters) The line item or sub-line item number set forth in the supplier contract schedule.	Supplier

ck 10. Preparation Instructions (Continued)

	Data Element	Definition	Input By
32	ELIN	(7 Characters) The line item or sub-line item number for deliverable requirements set forth in an exhibit of the supplier contract.	Supplier
33	Warranty	(1 Character) Indicates whether the CLIN or ELIN is warranted.	Supplier initially, Data Control thereafter
34	Record Established	(15 Characters) The contractor code, the individual's initials, and the date associated with the establishment of the line record.	Computer Generated
35	Last Update	(15 Characters) The contractor code, the individual's initials, and the date associated with the most recent update of the line record.	Computer Generated
36	Codes	(4 Characters) Four single character fields (Code 1, Code 2, Code 3, and Code 4) used to select for maintenance functions. Code 1 and 2 are used to "mark" (an "X" in each field) a line record to be deactivated. (NOTE: These line records are not deactivated until they are physically moved to the inactive file).	Supplier/ User
37	GFP Date	(7 Characters) The date the Government Furnished Property is contractually required to be on dock at the user destination.	Computer Generated
38	Ship Address	(4 Characters) A coded reference to a complete shipping address. (The actual address is not maintained in the MESA data base).	User
39	PSRBD #	(7 Characters) The number of the Program Support and Reallocation Board Directive (PSRBD) related to a reallocation of the equipment.	Supplier/ User
