DATA ITEM DESCRIPTION

Title: PROPOSED CRITICAL MANUFACTURING PROCESS DESCRIPTION (PCMPD)

Number: DI-SESS-81012F
AMSC Number: 9931
DTIC Applicable:
Preparing Activity: AR
Applicable Forms:

Approval Date: 24 April 2018
Limitation:
GIDEP Applicable:
Project Number: SESS-2018-033

Use/relationship: The Proposed Critical Manufacturing Process Description (PCMPD) identifies processes which are proposed for inclusion in the Technical Data Package (TDP) as mandatory to meet the engineering requirements of the item or a component part thereof for which the TDP is being prepared.

a. This Data Item Description (DID) contains the format and content preparation instructions for the data resulting from the work task described by 5.13.4 of MIL-STD-31000.

b. This DID is applicable to acquisitions in which the Government intends to retain approval authority over designating manufacturing processes as mandatory.

c. This DID supersedes DI-SESS-81012E and is related to DI-SESS-81000F.

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. General. The PCMPD shall meet the requirements of MIL-STD-31000.

3. Format. The PCMPD shall be in the contractor's format.

4. Content. The PCMPD shall include as applicable:
   a. Contractor's name, address and CAGE Code.
   b. Contract number.
   c. Item nomenclature and part number to which the proposed process applies.
   d. Drawing number or specification number which defines the process in detail.
   e. An explanation as to why the process should be considered critical or mandatory to the manufacture of the item or part.
   f. A statement as to whether or not the process or portions thereof are considered contractor proprietary and the status of Government rights in technical data.

5. End of DI-SESS-81012F.
