COMMERCIAL ITEM DESCRIPTION

HOLDER, PLANER AND SHAPER, ADJUSTABLE

The General Services Administration has authorized the use of this commercial item description.

1. SCOPE

1.1 Scope. This description covers tool holders that are designed to hold and support cutter bits that are used on metal working planers and shapers.

1.2 Classification. The tool holders shall be of the sizes specified in table I. The size to be furnished shall be as specified (see 6.1). All tolerances of dimensional data shall be the same as the tolerances on the manufacturer's part drawings.

TABLE I. Adjustable planer and shaper tool holder, sizes and capacities.

Tool holder size	Shank thickness; inches	Shank height; inches	Shank length; inches	Width of notched tool channel; inches		Size of tool bit furnished	
				min.	max.	cross-section inches	length inches
4	3/8	7/8	5-1/2	0.327	0.351	5/16 x 7/16	3
0	5/8	1-1/4	6-1/8	0.327	0.351	5/16 x 7/16	3
1	3/4	1-1/2	7-9/16	0.390	0.427	3/8 x 1/2	3-1/2
2	1-1/8	1-3/4	10	0.515	0.543	1/2 x 3/4	4-1/2
3	1-3/8	2	12-1/2	0.640	0.678	5/8 x 7/8	5

AMSC N/A FSC 3460

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

2. APPLICABLE DOCUMENTS

2.1 Documents. The following documents of the issue in effect on the date of invitation for bids or request for proposals form a part of this description to the extent specified herein.

Federal Specification PPP-P-40	- Preservation and Packing of Hand Tools and Tool Accessories for Power Driven, Metal and Woodworking Machinery.
Federal Standard FED-STD-376	- Preferred Metric Units for General Use by the Federal Government.
American Society for Testing and Materials ASTM A 600	- Standard Specification for - High-Speed Tool Steel
American Society for Testing and Materials ASTM D 3951	- Standard Practice for Commercial Packaging.

3. SALIENT CHARACTERISTICS

3.1 Design. The holder shall be new and of the manufacturer's commercial design in effect on the date of the solicitation. The holder shall meet the requirements specified herein and conform to current industrial practice.

3.2 Materials. Materials used in the manufacture of the holder shall be of a quality necessary to produce a product that conforms to the requirements specified herein.

3.3 Components. Adjustable planer and shaper holders shall consist of a body, clamping device, tool bit and wrench.

3.3.1 Body. The body shall have an integral shank and tool supporting head, shall be of drop-forged alloy steel, and heat treated to a Rockwell"C" 40 to 48 hardness.

3.3.2 Tool supporting head. The head shall support cutter bits parallel to the base of the holder and in various angular positions around the axis of the head.

3.3.3 Clamping device. The clamping device shall be of steel and rigidly clamp a tool bit to the supporting head.

3.3.4 Tool bit. A tool bit made of high speed steel conforming to the requirements of ANSI/ASTM A600 shall be furnished with each tool holder. The dimensions of the tool bit shall conform to table I.

3.3.5 Wrench. A wrench to fit the clamping device shall be furnished with each holder.

3.4 Measurement system. All dimensions in this description are given in US units. These dimensions may be converted to SI units through the use of conversion factors and methods specified in FED-STD-376.

3.5 Regulatory requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

3.6 Workmanship. Workmanship of the holder shall be of a quality equal to that of comparable products furnished to the commercial market.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection, examination, and test requirements specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections, examinations, or tests set forth in this description where such inspections, examinations, and tests are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Responsibility for compliance. All items shall meet all requirements of sections 3 and 5. The inspection set forth in this description shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requiremqnts in the description shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection, as part of manufacturing operations, is an acceptance practice to ascertain conformance to requirements, however, this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to accept defective material.

4.2 Sampling inspection. As a minimum sampling inspection, the supplier shall randomly select the number of samples in table II that is applicable to the quantity of items being purchased. Each sample item shall be inspected to determine conformance with the examination in 4.3 and the dimensional inspection in 4.4. Should any of the samples fail to meet either the examination or inspection below, the entire lot shall be considered defective and unsuitable for acceptance. A lot is defined as all items of the same type, style, size, and class presented at one time for acceptance.

TABLE II. Sampling plan.

Quantity of items being purchased	Sample size	Quantity of items being purchased	Sample size
2 to 8	2	91 to 150	20
9 to 15	3	151 to 280	32
16 to 25	5	281 to 500	50
26 to 50	8	501 to 1200	80
51 to 90	13		

4.3 Examination. Each holder submitted for sample inspection shall be visually examined to determine conformance with all requirements of this description except the hardness tests.

4.4 Dimensional inspection. Each holder submitted for sample inspection shall be inspected to assure conformance with all dimensional and tolerance requirements specified herein.

4.5 Hardness test. After the sample inspection has been completed, a hardness test shall be performed on 10 percent of the sample holders body. If any of the test samples fail to meet the applicable hardness specified herein, the total lot from which the samples were selected shall be rejected.

4.6 Packaging inspection. Packaging shall be inspected for conformance with section 5.

5. PACKAGING

5.1 Preservation, packing, and marking. Unless otherwise specified in the contract or purchase order preservation, packing, and marking shall be in accordance with ASTM D 3951. When specified (see 6.1) preservation, packing, and marking shall be in accordance with PPP-P-40, level as specified.

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

a. Title, number, and date of this commercial item description.

b. Size and quanity required (see 1.2).

c. Packaging in accordance with PPP-P-40 if required, specify level required (see 5.1).
