INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

FILLER, TWO-COMPONENT TYPE: FOR DENTS, CRACKS, SMALL HOLES, AND BLOW HOLES

This interim amendment was developed by the General Services Administration, Federal Supply Service, Washington, DC 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this interim amendment as a valid exception to Federal Specification TT-F-322D dated October 24, 1973.

PAGE 3

Table II, under "Characteristics", line 4, delete "D-60" and substitute "D-50".
