COMMERCIAL ITEM DESCRIPTION

SODIUM METASILICATE, TECHNICAL

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification O-S-604.

This commercial item description covers two types of sodium metasilicate for use in various washing, cleaning and scouring processes, with or without soap or detergents as conditions demand.

The sodium metasilicate shall be of the following types:

Type I - Pentahydrate ($Na_2SiO_3 \cdot 5H_2O$).

Type II - Anhydrous (Na_2SiO_3).

Salient characteristics:

The sodium metasilicate shall be white and granular and conform to ASTM D 537.

The issue of ASTM D 537 in effect on the date of the solicitation shall be used to determine compliance with stated requirements.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing, and marking. Packaging, packing, and marking shall be as specified in the contract or order.

Note: The ASTM standards are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.
