COMMERCIAL ITEM DESCRIPTION

SHAKER, SALT OR PEPPER

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification RR-K-260, type VIII.

This description covers aluminum salt or pepper shakers intended for domestic or institutional use.

Salient characteristics:

Material. The body and cap shall be a minimum 0.020 inch thick and shall be formed seamless from single pieces of aluminum alloy.

Dimensions. The shakers shall have a maximum diameter of 3 inches, a maximum height of 4 inches and a minimum capacity of 9 cubic inches.

Cap. Shall be furnished and shall screw onto the body of the shaker. Holes in the cap shall be in accordance with the manufacturer's standard practice.

Finish. Clear anodized.

Workmanship. All sharp edges, slivers and burrs shall be removed. All deep scratches, pits and tool marks on interior and exterior surfaces shall be removed, and shall be free of any defects which may impair durability, appearance or serviceability.

Testing. Shaker shall be filled to capacity with water and the volume of water measured shall not be less than 5 fl. oz. (9 cubic inches).

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.
