FEDERAL SPECIFICATION

RESPIRATOR ASSEMBLY: HALF MASK, AIR FILTERING, COMBINATION CHEMICAL CARTRIDGE AND FILTER (FOR ORGANIC VAPORS, PAINT SPRAYS AND DUSTS)

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

The complete requirements for procuring the respirators described herein shall consist of this document and the issue in effect of GGG-M-125/GEN.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers the requirements for a half-mask respirator with a combination chemical cartridge and air filter for removing dust, paint spray mists, and organic vapors from respirable air.

1.2 Classification. Half-mask respirators covered by this specification shall be of the following types as specified (see 6.2):

Type I - Half-mask, air-purifying respirator, with provisions to replace the air-purifying element(s) (reusable).
Type II - Half-mask, air-purifying respirator where the chemical cartridge(s) is/are not intended to be replaceable, but with provisions to replace the filter(s) (disposable).

2. APPLICABLE DOCUMENTS

Latest issue of GGG-M-125/GEN and documents referenced therein and the additional documents specified herein.

3. REQUIREMENTS

3.1 Approval and certification. (See GGG-M-125/GEN).

3.2 Design. The respirator shall provide protection against concentrations of organic vapors, paint spray mists, and dusts specified in 30 CFR, part 11. Respirator masks shall be of a design that covers the mouth and nose, leaving the eyes uncovered (see figures 1 and 2). The design shall allow respirable air to pass through the filter with minimum resistance to breathing when worn. The lower part of the half-mask facepiece shall make facial contact under the chin. The design shall provide a gas-tight seal with the face, when worn.

3.3 Principal parts. Respirators shall consist of the following parts where required:

a. Half-mask flexible facepiece.
b. Head harness (see 3.3.1).
c. Exhalation valve or valves (see 3.3.2).
d. Inhalation valve or valves (see 3.3.3).
e. Chemical cartridge(s) (see 3.3.4).
f. Filter(s) (see 3.3.5).

3.3.1 Head harness. The head harness shall be adjustable and secure the respirator facepiece to the wearer's head.

3.3.2 Exhalation valve(s). The exhalation valve or valves shall be securely mounted on the facepiece, and shall permit passage of the exhaled air and prevent entrance of air into the mask during inhalation.

3.3.3 Inhalation valve(s). The inhalation valve or valves shall prevent the passage of exhaled air into the air-purifying elements.

3.3.4 Chemical cartridge(s). The chemical cartridge(s) shall remove organic vapors from respirable air. A cartridge may also contain an integral filter for removal of particulate matter from air.

3.3.4.1 Chemical cartridge-filter combinations for type I respirator. Unless otherwise specified (see 6.2), 25 cartridges and 50 filters shall be furnished with each type I respirator having a single receptacle mask and 50 cartridges and 100 filters shall be furnished with each type I respirator having a dual mask.

3.3.5 Filter(s). Filters shall remove particulate matter from air. A filter may be attached to a chemical cartridge.

3.3.5.1 Filters for type II respirator. Unless otherwise specified (see 6.2), 10 filters shall be furnished with each type II respirator.

3.4 Interchangeability. Requirements in accordance with GGG-M-125/GEN.

3.5 Instructions. Requirements in accordance with GGG-M-125/GEN.

3.6 Marking. Requirements in accordance with GGG-M-125/GEN.

3.7 Sanitization. Type I shall conform to the cleaning and sanitization requirements specified in GGG-M-125/GEN.

3.8 Spare parts. When specified (see 6.2), spare parts shall be furnished with each respirator.

4. QUALITY ASSURANCE PROVISIONS

4.1 Quality assurance provisions shall be in accordance with the requirements of GGG-M-125/GEN and the additional requirements specified herein.

4.2 Examination. Respirator samples selected in accordance with GGG-M-125/GEN shall be examined for the defects listed in table I.

TABLE I. Classification of defects.

Categories	Defects
Major:	
101	Type not as specified.
102	Respirator not in accordance with NIOSH/MSHA requirements.
103	Principal parts missing.
104	Chemical cartridge and/or filter not as specified.
105	Quantity of extra cartridges and/or filters not as specified.
106	Instructions missing.
107	Marking not as specified.
108	Spare parts missing when specified.
109	Poor workmanship.

4.3 Tests. Respirator assemblies sampled in accordance with GGG-M-125/GEN shall be subjected to the following test:

a. Cleaning and sanitization test type I only (see GGG-M-125/GEN).

5. PREPARATION FOR DELIVERY (In accordance with GGG-M-125/GEN).

6. NOTES

6.1 Intended use. Half-mask respirators covered by this specification are intended to give protection to the respiratory organs of the wearer from organic vapors, paint spray vapors, and dust in atmospheres not immediately dangerous to life or health.

6.2 Ordering data. Purchasers shall select the preferred options offered herein and include the following data in procurement documents:

a. Title, number, and date of this specification.
b. Title and date of general specification GGG-M-125/GEN.
c. Type of respirator required (see 1.2).
d. If different quantity of cartridges and/or filters is required (see 3.3.4.1 and 3.3.5.1).
e. Specify if spare parts are required and list quantity of each type of spare parts required (see 3.8).
f. Level of packaging and level of packing required (see GGG-M-125/GEN).

6.3 Cross reference of classifications. The following respirators were previously classified as indicated:

New	Old
GGG-M-125/6A Type I	GGG-M-125/6
