MATERIAL: Polytetrafluoroethylene resin in accordance with Federal Specification L-P-403.

COLOR: White.

DESIGN: Disk filters shall be a thin polymeric structure (approximately 130 micrometers thickness) with uniform pore size, which accounts for approximately 80% of the filter volume. They shall be made of polytetrafluoroethylene bonded to high density polyethylene net to improve handling. Filters are autoclavable and can be used at temperatures up to 130°C (265°F). Above that temperature, the polyethylene backing structure begins to soften.

NOTES:
1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
2. Referenced documents shall be of the issue in effect on date of invitations for bid.
3. FSCM: 08071.

(A) ENTIRE STANDARD REVISED

APPROVED 4 June 1969 REVISED (A) 3 FEB 1984

USER ACTIVITIES: ARMY - MD, DM
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
AIR FORCE - 82

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
