MIL-N-246B
INTERIM AMENDMENT 2 (AR)
8 March 1990
SUPERSEDING
INTERIM AMENDMENT 1
15 July 1977

MILITARY SPECIFICATION

NITROGLYCERIN

This Interim Amendment is issued for use by the U.S. Army Armament Research and Development Command with Military Specification MIL-N-246B dated 19 February 1962.

PAGE 1

* STANDARDS, MILITARY, Add the following:

"MIL-STD-1235 - Single and Multi Level Continuous Sampling Procedures and Tables for Inspection by Attributes"

* Delete the following in its entirety:

"PUBLICATIONS

QUARTERMASTER CORPS

ORD-M-608-11 - Procedures and Tables for Continuous Sampling by Attributes."

PAGE 4

* 4.2.1 Lot formation: Delete "3000 pounds" and substitute "6000 pounds, except when the continuous sampling option is utilized".

* 4.2.2 Examination: Delete "Handbook ORD-M-608-11" and substitute "MIL-STD-1235".

* 4.2.3.1 Sampling. Delete the first sentence and substitute the following:

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

* "4.2.3.1 Sampling. Using a rubber dipper, a sample of approximately two ounces shall be removed from NG lots according to the following frequencies:

(1) Continuous process. If the operating area has been inactive for 90 days, when production is resumed, each lot will be sampled and all tests specified in Paragraph 3, Requirements of MIL-N-246B, in addition to pH of wash water, will be performed, until fifteen (when the 3,000 lbs storage tanks are used) or until eight (when the 6,000 lbs storage tanks are used) acceptable lots have been produced. Thereafter, each lot will be tested for pH of wash water and KI of Nitroglycerin (NG). Furthermore, complete analysis as specified in Paragraph 3, Requirements, MIL-N-246B, will be performed on every tenth lot (when the 3,000 lbs storage tanks are used) or on every fifth (when the 6,000 lbs tanks are used) in addition to the pH of wash water test. In the event that a test result is not acceptable, each lot will be tested according to Paragraph 3 of MIL-N-246B, in addition to the pH of the wash water, until ten (when the 3,000 lbs storage tanks are used) or five (when the 6,000 lbs storage tanks are used) consecutive acceptable lots have been produced. Thereafter, each lot will be tested for pH of wash water and KI of NG, and each tenth lot (when the 3,000 lbs storage tanks are used) or each fifth lot (when the 6,000 lbs storage tanks are used) will be tested for pH of wash water in addition to all requirements of Paragraph 3, MIL-N-246B.

(2) Batch process. Every lot will be tested according to Paragraph 3, Requirements of MIL-N-246B, in addition to the pH of the wash water."

* Add paragraph 4.2.3.2 as follows:

"4.2.3.2 Continuous sampling option. Continuous sampling plans may be utilized subject to the approval of the procuring activity."

* Add paragraph 4.2.3.3 as follows:

"4.2.3.3 Alternative sampling for batch or continuous process for the manufacture of Nitroglycerin. Each of the first 10 lots produced shall be sampled and tested to all requirements specified in paragraph 3.1. After 10 consecutive acceptable lots have been produced, the Contractor may thereafter test a representative sample from

every tenth lot and perform tests as required in paragraph 3.1. (A representative sample is defined as one sample from one in ten production lots). pH of the Nitroglycerin wash water will be continuously monitored on every lot manufactured. Application for use of this alternate sampling or an equivalent plan shall be subject to approval of the Contracting Officer.

PAGE 5

4.3.2 Determination of acidity or alkalinity. Delete "Benzene" wherever it appears and substitute "toluene".

PAGE 7

* Delete paragraph 5 in its entirety and replace with the following:

"5. PACKAGING

5.1 Packaging. Nitroglycerin is classed as a forbidden explosive in Code of Federal Regulations (CFR), Title 49. For shipment on public highways, see CFR Title 49, paragraphs 173.512 and 177.82.

5.2 Marking. Marking of interior packages and exterior shipping containers shall be as specified in CFR Title 49 and MIL-STD-129."

The margins of this interim amendment are marked with an asterisk or vertical lines to indicate where changes (additions, modifications, corrections, deletions) from the previous interim amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous interim amendment."
