COMMERCIAL ITEM DESCRIPTION

BLEACH, LAUNDRY, ACTIVE OXYGEN (SODIUM PERCARBONATE)

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers an oxygen type granular laundry bleach based on sodium percarbonate.

Salient characteristics. The product shall be a white, free-flowing granular material consisting primarily of sodium percarbonate.

Physical and Chemical Characteristics

Characteristics	Requirement	Test Method
Available oxygen	12.8% (w/w) min.	ASTM D 2180
Sodium carbonate	41.5% (w/w) min.	ASTM D 501 #19-24
Apparent density	1.05 - 1.25 g/cc	ASTM D 501 #30-31
Iron	10 ppm max.	ASTM E 359 #49-57
pH (1% solution)	10.0 - 10.6	ASTM E 70

Rate of dissolution. Three minutes after 2 g of the product is added to 1 liter of water at 15°C, not less than 99.5 percent of the product shall have dissolved.

Weigh two 2 ± 0.05 g samples of the product to the nearest mg and place into two beakers each containing 1-liter of distilled water. Stir with a stirring bar and magnetic stirrer at the slowest speed possible. After exactly 3 minutes, filter the contents of each beaker through separate pieces of tared, dessicated filter paper with suction. There shall be no undissolved material left in the beakers. Dessicate the filter paper, reweigh and calculate the percent of the original material that did not dissolve.

The issue of the ASTM standards in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing, and marking. The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

ASTM standards are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.
