COMMERCIAL ITEM DESCRIPTION

HELMET, WELDER'S

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification GGG-H-211.

This description covers a helmet which protects the face, head and neck from heat, welding spatter and radiant energy.

Salient characteristics:

Helmet shall have a curved or bib front and a lift front plate holder, and shall consist of the following components

Shell. Shall be thermally insulated and non-combustible or slow burning.

Headgear. Shall retain the helmet comfortably and firmly and shall be so constructed that the helmet may be tilted back over the wearer's head.

Sweatband. Shall be removable and replaceable and shall be made of leather or other material which is slow-burning, non-irritating and non-allergenic.

Headband. Shall be readily adjustable to head sizes 6-1/2 to 7-5/8.

Chin rest. Shall extend inside helmet, across the bottom and function as a position stop. This chin rest is not required if a position stop is provided on the headgear.

Lift front. Shall be so constructed so that the lift portion is either up or down. Shall be light-tight when plates are in position.

Hardware. Any metal parts, including rivets, which extend through the shell of the helmet and which might touch the wearer's head or face, shall not be exposed on the inside of the helmet. Such metal parts shall be insulated by an overlap of nonconductive insulating material which completely insulates and covers such metal parts.

Conformance. Welding helmets shall comply with the requirements in American National Standards Institute (ANSI) Z87.1.

The issue of ANSI in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

ANSI Z87.1 can be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018.
