MATERIAL: Comparator and slides shall be of molded, acid-resisting plastic.

Color standards shall be non-fading.

Glass components shall be of borosilicate glass in accordance with Federal Specification DD-G-541, Type 1, Class A.

DESIGN: Base, MS36462-1, and any color standard slide, MS36462-2 thru MS36462-10, combine to form a slide-type comparator.

Comparator shall be designed for direct viewing.

Each color standard slide shall contain nine color standards alternated with distilled water blanks. The pH value of each color standard shall be clearly marked directly above that color standard on the slide. The pH range of the entire slide and the indicator solution to be used with that slide shall also be indicated on the slide.

PURPOSE: For determining the pH value of liquid samples by visual color comparison.

COMPONENTS: Color standard slides shall be supplied with two vials of the indicator specified (vials having 0.5 ml dropping pipets), five 5 ml test tubes, a sponge, and operating instructions.

NOTES:
1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements as specified herein.
2. Referenced documents shall be of the issue in effect on date of invitations for bid.

APPROVED 7 OCT 1982 REVISED

This military standard is approved by the Department of Defense and is mandatory on all activities. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
