DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

1. TITLE	2. IDENTIFICATION NUMBER
Non-Standard Parts Test Data Report	DI-MISC-81058

3. DESCRIPTION / PURPOSE

3.1 The Non-Standard Parts Test Data Report provides test data applicable to contractor proposed non-standard parts.

(Continued on Page 2)

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABL
901009	A/SLCET-RE		

7. APPLICATION / INTERRELATIONSHIP

7.1 This Data Item Description contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement for this data included in the contract.

7.2 The Non-Standard Parts Test Data Report is related to DI-MISC-80071 "Part Approval Request" and DI-MISC-80072 "Program Parts Selection List (PPSL)".

(Continued on Page 2)

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		A5018

10. PREPARATION INSTRUCTIONS

10.1 Reference documents. The applicable issue of the documents cited herein, including their approval date and dates of any applicable amendments, notices, and revisions shall be as specified in the contract.

10.2 General. The Non-Standard Parts Test Data Report shall be accurate, complete, and in sufficient detail to substantiate that the proposed non-standard part complies with all requirements delineated in the proposed procurement document(s). The report shall depict the actual test data acquired as a result of specific tests performed on samples of the non-standard part. Specifications for the standard part characteristics or design parameters shall not be included as test data.

10.3 Format. The Non-Standard Parts Test Data Report format shall be in accordance with 5. of MIL-STD-831.

10.4 Content. The Non-Standard Parts Test Data Report content shall be as follows:

10.4.1 Test results. Complete identification and description of test results from tests conducted under critical conditions equal to or greater than those specified within the contractor's proposed procurement document(s) for the non-standard part. In addition, test results from tests conducted in accordance with 4.5 of MIL-STD-965A shall be identified and described.

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

3. Description/Purpose (Continued)

3.2 The Non-Standard Parts Test Data Report is used to evaluate the contractor proposed non-standard parts to determine their compliance with the specific requirements contained in the proposed procurement document(s).

---

7. Application/Interrelationship (Continued)

7.3 The solicitation and contract should identify the time period during which the specific tests must have been conducted for the test data to be included in the Non-Standard Part Test Data Report. For example: "Non-standard part test data provided in conjunction with a request for non-standard part approval must be acquired as a result of testing conducted (specify interval of time, e.g. 90 days) prior to submission of the non-standard part approval request or since the last process change control to the non-standard part, whichever is sooner."

7.4 This Data Item Description supersedes DI-E-7030 "Test Data for Non-Standard Parts".

---

10. Preparation Instructions (Continued)

10.4.2 Testing requirements. When identification of the test set-up, test equipment, test procedures, calibration, or other aspects of the testing requirements is necessary for an adequate understanding of the test data, this information shall be including using applicable text, illustrations, drawings, sketches, and schematics.

10.4.3 Test data composition. The report shall consist of test data in existence prior to contractor selection of the proposed non-standard part (e.g., Government Industry Data Exchange Program Report, Supplier's Test Reports), test data generated subsequent to contractor selection of the proposed non-standard part (e.g., contractor/supplier performed testing), or a combination of both.
