DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

2. TITLE ENCLOSURE SYSTEM IMPLEMENTATION PLAN	1. IDENTIFICATION NUMBER DI-MISC-81061

3. DESCRIPTION/PURPOSE

3.1 This plan details the proposed usage of enclosure systems for use in Standard Enclosure Systems (SES) of the Standard Hardware Acquisition and Reliability Program (SHARP).

4. APPROVAL DATE *(YYMMDD)* 901012	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR) SH	6a. DTIC REQUIRED	6b. GIDEP REQUIRED

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for the enclosure system implementation plan resulting from the work task described by 5.5.1 of MIL-STD-2200.

7.2 This DID is applicable to the acquisition of military systems and equipment.

7.3 This DID is related to DI-MISC-81062, DI-MISC-81063, and DI-MISC-81064

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER N5024

10. PREPARATION INSTRUCTIONS

10.1 Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

10.2 Format. The plan shall be in contractor's format.

10.3 Content. The enclosure system implementation plan shall contain all the information necessary to evaluate the contractor's rationale for the selection of enclosure systems during the preliminary design and critical design phases of an electronic system/equipment design.

10.3.1 Content for preliminary design review. The plan shall include the following information:

10.3.1.1 Proposed usage of SES enclosure hardware selected from TP-532 and any modifications required to this hardware.

10.3.1.2 Proposed usage of SES enclosure hardware classified as in-process designs in 4.2.2 of MIL-STD-2200.

(continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Block 10, PREPARATION INSTRUCTIONS (Continued)

10.3.1.3 Proposed usage of other enclosure hardware with engineering drawings and justification for use based on technical adequacy and commercial availability.

10.3.1.4 Proposed utilization of enclosures within the system/equipment.

10.3.1.5 Module format and quantity per enclosure.

10.3.1.6 Anticipated thermal load and proposed cooling technique.

10.3.1.7 Preliminary quality assurance plan.

10.3.1.8 Development schedule and milestones.

10.3.1.9 Identification of special or anticipated problems.

10.3.2 Content for critical design review. The plan for critical design review shall contain current information for the data specified in 10.3.1 and shall also include the following:

10.3.2.1 Thermal analysis. The thermal analysis shall contain all assumptions, diagrams, nodal models, procedural flow charts, and thermal properties of materials used in the analysis. The analysis should also contain the location and anticipated power dissipation of electronic modules, power supplies, and other assemblies.

10.3.2.2 Structural analysis. The structural analysis shall contain all assumptions, diagrams, nodal models, excitation inputs, procedural flow charts, and structural properties of materials used in the analysis.

10.3.2.3 Formal Quality assurance plan.

10.3.2.4 Resolution of previously identified problems.
