DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

2. TITLE	1. IDENTIFICATION NUMBER
BACKPLANE ASSEMBLY IMPLEMENTATION PLAN	DI-MISC-81062

3. DESCRIPTION/PURPOSE

3.1 This plan details the proposed usage of backplane assemblies for use in Standard Enclosure Systems (SES) of the Standard Hardware Acquisition and Reliability Program (SHARP).

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC REQUIRED	6b. GIDEP REQUIRED
901012	SH		

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instructions for the backplane assembly implementation plan resulting from the work task described by 5.4.1 of MIL-STD-2200.

7.2 This DID is applicable to the acquisition of military systems and equipment.

7.3 This DID is related to DI-MISC-81061 , DI-MISC-81063 , and DI-MISC-81064

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		N5025

10. PREPARATION INSTRUCTIONS

10.1 Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

10.2 Format. The plan shall be in contractor's format.

10.3 Content. The backplane assembly implementation plan shall contain all the information necessary to evaluate the contractor's rationale for the selection of backplane assemblies during the preliminary design and critical design phases of an electronic system/equipment design.

10.3.1 Content for preliminary design review. The plan shall include the following information:

10.3.1.1 Proposed usage of backplane assemblies conforming to the requirements of MIL-STD-2119 and MIL-A-28870 for printed-wiring backplane assemblies, or MIL-STD-2198 and MIL-A-24741 for metal backplane assemblies.

(continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Block 10, PREPARATION INSTRUCTIONS (Continued)

10.3.1.2 Proposed usage of backplane assemblies that deviate from the requirements of MIL-STD-2119 and MIL-A-28870 for printed-wiring backplane assemblies and MIL-STD-2198 and MIL-A-24741 for metal backplane assemblies with justifications.

10.3.1.3 Engineering drawings of the proposed backplane assemblies and proposed utilization of the backplane assemblies within the system/equipment.

10.3.1.4 Electrical design information for the backplane assemblies including the following:

a. Electrical design guidelines.
b. Identification of critical signals.
c. Anticipated electrical parameters and margins.
d. Interconnection methods.
e. Preliminary electrical analysis data (see 10.3.2.2) and test results.

10.3.1.5 Preliminary quality assurance plan.

10.3.1.6 Development schedule and milestones.

10.3.1.7 Identification of special or anticipated problems.

10.3.2 Content for critical design review. The plan for critical design review shall contain current information for the data specified in 10.3.1 and shall also include the following:

10.3.2.1 Electrical design information. Additional electrical design information as follows shall be included:

a. Design electrical parameters and margins.
b. Formal electrical analysis (see 10.3.2.2)
c. Test methods to verify electrical parameters.
d. Test results.

10.3.2.2 Electrical analysis. The electrical analysis shall include all assumptions used in the analysis and shall address the following areas:

a. Dynamic noise immunity.
b. Data transfer rates.
c. Power busing requirements.
d. Permissible signal attenuation.
e. Characteristic impedance requirements.

Block 10, PREPARATION INSTRUCTIONS (Continued)

10.3.2.3 Formal quality assurance plan.

10.3.2.4 Resolution of previously identified problems.
