DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
COMPUTERIZED TARGET DESCRIPTION	DI-MISC-81108

3. DESCRIPTION/PURPOSE

The computerized target description is a detailed geometrical representation of exterior and interior elements that comprise an air vehicle (target). It is used by the contractor and Air Force engineering activities for analyzing and predicting the vulnerability of a system to various threat types; it is used by the contracting activity to verify the work done by the contractor.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
901140	F/ASD-ENES		

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains format and content preparation instructions for the data product generated by a specific and discrete task requirement in the contract.

7.2 This DID may be applied in any contract and during any program phase to acquire a target description or to update a target description when the air vehicle design or configuration changes.

7.3 This DID supersedes DI-R-30514.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		F5082

10. PREPARATION INSTRUCTIONS

10.1 *Content.* Computerized target description data shall include the following:

a. A detailed discussion of the description technique used. Complete documentation shall be provided for any new techniques or modification to government-furnished techniques. If a government-furnished technique is used without change, provide appropriate reference to the documentation for that technique.

b. All flight- and mission-critical elements, plus all other noncritical elements which can provide effective shielding of critical elements.

c. A sketch of the air vehicle showing the coordinate system used, and a three-view drawing showing the 0.0 reference stations to scale.

d. Drawings generated by computer graphics to verify that the description technique provides a complete and correct representation of all flight- and mission-critical elements, noncritical elements, and air (vacant) spaces modeled.

e. Component sketches showing the data points chosen and x-y-z coordinate measurements from the 0.0 reference stations.

(Continued on page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:43Z
Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

f. A coded list of all components modeled into the target description. The list shall identify:

(1) Component name and identification number.

(2) Space identification number.

(3) Component material properties, normal thickness, and ballistic density ratio where applicable.

(4) Each component that is redundant and the specific subsystem of which it is a part.

(5) The air vehicle kill level caused by loss of the component.

(6) Any other coding or identification data required by the modeling technique used.

10.2 *Format.*

a. Electronic format shall be compatible with the hardware and software specified by the contracting activity.

b. For supporting documentation, contractor format is acceptable.
