PERFORMANCE SPECIFICATION SHEET

SEMICONDUCTOR DEVICE, DIODE, SILICON, POWER RECTIFIER, DUAL,
COMMON CATHODE OR ANODE CENTER TAP, ULTRAFAST, TYPES 1N6657 THROUGH 1N6659
AND 1N6657R THROUGH 1N6659R, JAN, JANTX, JANTXV, AND JANS

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-PRF-19500.

1. SCOPE

1.1 Scope. This specification covers the performance requirements for a silicon, dual high voltage, ultrafast power rectifier diodes. Four levels of product assurance are provided for each device type as specified in MIL-PRF-19500.

1.2 Physical dimensions. See figure 1 (TO-254AA isolated).

1.3 Maximum ratings. (per leg)

Types	V_{RWM}	I_{FSM} (1) t_p = 8.3 ms	I_F T_C = 100°C (1) (2) (3)	t_{rr} (1)	$R_{\theta JC}$ (1)	$R_{\theta JA}$ (1)	T_{STG} and T_J
	V dc	A (pk)	A dc	ns	°C/W	°C/W	°C
1N6657, 1N6657R	100						
1N6658, 1N6658R	150	150	15	35	2.3	40	-65 to +200
1N6659, 1N6659R	200						

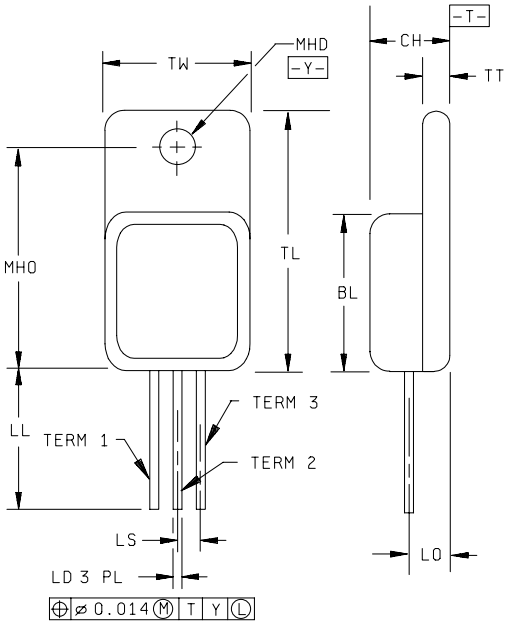

(1) Each individual diode.
(2) Derate linearly at 300 mA/°C from +100°C to +150°C.
(3) Total package current is limited to 30A dc.

* Comments, suggestions, or questions on this document should be addressed to Defense Supply Center, Columbus, ATTN: DSCC-VAC, P.O. Box 3990, Columbus, OH 43218-3990, or emailed to Semiconductor@dscc.dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at http://assist.daps.dla.mil.

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3, 4, or 5 of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of documents cited in sections 3, 4, or 5 of this specification, whether or not they are listed.

2.2 Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DEPARTMENT OF DEFENSE SPECIFICATIONS

MIL-PRF-19500 - Semiconductor Devices, General Specification for.

DEPARTMENT OF DEFENSE STANDARDS

MIL-STD-750 - Test Methods for Semiconductor Devices.

* (Copies of these documents are available online at http://assist.daps.dla.mil/quicksearch/ or http://assist.daps.dla.mil.or from the Standardization Document Order Desk, 700 Robbins Avenue, Building 4D, Philadelphia, PA 19111-5094.)

2.3 Order of precedence. In the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 General. The individual item requirements shall be as specified in MIL-PRF-19500 and as modified herein.

3.2 Qualification. Devices furnished under this specification shall be products that are manufactured by a manufacturer authorized by the qualifying activity for listing on the applicable qualified manufacturer's list (QML) before contract award (see 4.2 and 6.3).

3.3 Abbreviations, symbols, and definitions. Abbreviations, symbols, and definitions used herein shall be as specified in MIL-PRF-19500.

3.4 Interface and physical dimensions. The interface and physical dimensions shall be as specified in MIL-PRF-19500, and on figure 1 (TO-254AA) herein. Methods used for electrical isolation of the terminal feed throughs shall employ materials that contain a minimum of 90 percent AL_2O_3 (ceramic). Examples of such construction techniques are metallized ceramic eyelets or ceramic walled packages. The US Government's preferred system of measurement is the metric SI system. However, since this item was originally designed using inch-pound units of measurement, in the event of conflict between the metric and inch-pound units, the inch-pound units shall take precedence.

Source: https://assist.dla.mil -- Downloaded: 2026-10-19T04:13Z
Check the source to verify that this is the current version before use.

3.4.1 Lead formation and finish. Lead finish shall be solderable as defined in MIL-PRF-19500, MIL-STD-750, and herein. Where a choice of lead finish or formation is desired, it shall be specified in the acquisition document (see 6.2). When lead formation is performed, as a minimum, the vendor shall perform 100 percent hermetic seal in accordance with screen 14 of MIL-PRF-19500.

3.4.2 Polarity. Polarity and terminal configuration shall be in accordance with figure 1 herein.

3.5 Marking. Marking shall be in accordance with MIL-PRF-19500.

3.6 Electrical performance characteristics. Unless otherwise specified herein, the electrical performance characteristics are as specified in 1.3 and table I herein.

3.7 Electrical test requirements. The electrical test requirements shall be the subgroups specified in table I herein.

3.8 Workmanship. Semiconductor devices shall be processed in such a manner as to be uniform in quality and shall be free from other defects that will affect life, serviceability, or appearance.

4. VERIFICATION

4.1 Classification of inspections. The inspection requirements specified herein are classified as follows:

a. Qualification inspection (see 4.2).

b. Screening (see 4.3).

c. Conformance inspection (see 4.4).

4.2 Qualification inspection. Qualification inspection shall be in accordance with MIL-PRF-19500 and as specified herein.

4.2.1 Group E qualification. Group E inspection shall be performed for qualification or re-qualification only. In case qualification was awarded to a prior revision of the specification sheet that did not request the performance of table II tests, the tests specified in table II herein that were not performed in the prior revision shall be performed on the first inspection lot of this revision to maintain qualification (see 4.4.4 herein).

Source: https://assist.dla.mil -- Downloaded: 2026-10-19T04:13Z
Check the source to verify that this is the current version before use.

* 4.3 Screening (JANS, JANTX, and JANTXV levels only). Screening shall be in accordance with appendix E, table IV of MIL-PRF-19500 and as specified herein. The following measurements shall be made in accordance with table I herein. Devices that exceed the limits of table I herein shall not be acceptable.

Screen (see appendix E, table IV of MIL-PRF-19500	Measurement	
	JANS level	JANTX and JANTXV levels
1a 1b	Required Required	Not required Required (JANTXV only)
2	Not required	Not required
3a 3b (1) 3c	Required Surge (see 4.3.1) Thermal impedance (see 4.3.2)	Required Surge (see 4.3.1) Thermal impedance (see 4.3.2)
4, 5, 6	Not applicable	Not applicable
7a 7b	Optional Optional	Optional Optional
8	Required	Not applicable
9	Applicable	Not applicable
10	Applicable	Applicable
11	V_{F1} and I_{R1}	V_{F1} and I_{R1}
12	Method 1038 of MIL-STD-750, test condition B; t = 240 hours; (see 4.3.3)	Method 1038 of MIL-STD-750, test condition A; t = 48 hours; V_R = 80 percent of rated V_R.
13	Subgroup 2 and 3 of table I herein; V_{F1} and I_{R1}; $\Delta V_{F1} = \pm 0.1$ V (pk); $\Delta I_{R1} = \pm 2$ µA dc or 100 percent from the initial value; whichever is greater.	Subgroup 2 of table I herein; V_{F1} and I_{R1}; $\Delta V_{F1} = \pm 0.1$ V (pk); $\Delta I_{R1} = \pm 2$ µA dc or 100 percent from the initial value; whichever is greater.
14a 14b	Required Required	Required Required
15	Required	Not required
16	Required	Not required

(1) Thermal impedance shall be performed any time after screen 3.

* 4.3.1 Surge current. Surge current, method 4066 of MIL-STD-750. $I_O = 0$; $V_{RM}(w) = 0$; I_{FSM} = see 1.3; six surges; $T_A = 25°C$, $t_p = 8.3$ ms, one minute minimum time between surges.

* 4.3.2 Thermal impedance measurements for screening. The thermal impedance measurements shall be performed in accordance with method 3101 of method 3101 of MIL-STD-750. The maximum limit (not to exceed the table I, subgroup 2 limit) for thermal impedance in screening (appendix E, table II of MIL-PRF-19500) shall be derived by each vendor by means of statistical process control. When the process has exhibited control and capability, the capability data shall be used to establish the fixed screening limit. In addition to screening, once a fixed limit has been established, monitor all future sealing lots using a random five piece sample from each lot to be plotted on the applicable X bar R chart. If a lot exhibits an out of control condition, the entire lot shall be removed from the line and held for engineering evaluation and disposition.

Source: https://assist.dla.mil -- Downloaded: 2026-10-19T04:13Z
Check the source to verify that this is the current version before use.

* 4.3.2.1 Thermal impedance measurements for initial qualification or requalification. The thermal impedance measurements shall be performed in accordance with method 3101 of MIL-STD-750 (read and record date $Z_{\theta JX}$). Thermal impedance shall be supplied on one lot (500 pieces minimum) and a thermal response curve shall be submitted. Twenty-two of these samples shall be serialized and provided to the qualifying activity for correlation prior to shipment of parts. Measurements conditions shall be in accordance with 4.4.1 herein.

4.3.3 Burn-in conditions. Burn-in conditions are as follows: T_A = room ambient as defined in the general requirements of 4.5 of MIL-STD-750. V_R = 0.8 to 0.85 rated V_R (see 1.3)

4.4 Conformance inspection. Conformance inspection shall be in accordance with MIL-PRF-19500 and as specified herein.

4.4.1 Group A inspection. Group A inspection shall be conducted in accordance with appendix E, table V of MIL-PRF-19500, and table I herein. The following test conditions shall be used for $Z_{\theta JX}$, table I inspection:

a. I_M measure current - - - - - - - - - - - - - - - 10 mA.

b. I_H forward heating current - - - - - - - - - 5 - 50 A.

c. t_M heating time - - - - - - - - - - - - - - - - 50 ms.

d. t_{MS} measurement delay time - - - - - - - 100 μs minimum.

The maximum limit for $Z_{\theta JX}$ under these test conditions are $Z_{\theta JX}$(max) = 1.8°C/W.

4.4.2 Group B inspection. Group B inspection shall be conducted in accordance with the conditions of appendix E, tables VIa (JANS) and VIb (JANTX and JANTXV) of MIL-PRF-19500. Electrical measurements (end-points) shall be in accordance with the applicable steps of table I, subgroup 2 herein.

4.4.2.1 Group B inspection, appendix E, table VIa (JANS of MIL-PRF-19500).

Subgroup	Method	Condition
B4	1037	T_A = room ambient as defined in the general requirements of 4.5 of MIL-STD-750. I_F or I_O = 1.25 to 10 A. Minimum for 2,000 cycles.

4.4.2.2 Group B inspection, appendix E, table VIb (JANTX and JANTXV of MIL-PRF-19500).

Subgroup	Method	Condition
B3	1037	T_A = room ambient as defined in the general requirements of 4.5 of MIL-STD-750. I_F or I_O = 1.25 to 10 A. Minimum for 2,000 cycles.

Source: https://assist.dla.mil -- Downloaded: 2026-10-19T04:13Z
Check the source to verify that this is the current version before use.

4.4.3 Group C inspection. Group C inspection shall be conducted in accordance with the conditions specified for subgroup testing in appendix E, table VII of MIL-PRF-19500. Electrical measurements (end-points) requirements shall be in accordance with the applicable steps of table I, subgroup 2 herein.

4.4.3.1 Group C inspection, appendix E, table VII of MIL-PRF-19500.

	Subgroup	Method	Condition
	C2	2036	Test condition A, weight = 10 pounds, t = 15 seconds.
*	C5	3101 or 4081	$R_{\theta JC}$ = 2.3°C/W.
	C6	1037	T_A = room ambient as defined in the general requirements of 4.5 of MIL-STD-750. I_F or I_O = 1.25 to 10 A for 6,000 cycles.

4.4.4 Group E inspection. Group E inspection shall be conducted in accordance with the conditions specified for subgroup testing in appendix E, table IX of MIL-PRF-19500 and table II herein.

4.5 Methods of inspection. Methods of inspection shall be as specified in the appropriate tables as follows.

4.5.1 Pulse measurements. Conditions for pulse measurement shall be as specified in section 4 of MIL-STD-750.

* 4.5.2 Burn-in and steady-state operation life tests. These tests shall be conducted with a half-sine waveform of the specified peak voltage impressed across the diode in the reverse direction followed by a half-sine waveform of the specified average rectifier current. The forward conduction angle of the rectified current shall not be greater than 180 degrees nor less than 150 degrees.

* TABLE II. Group E inspection (all quality levels) for qualification and requalification only.

Inspection	MIL-STD-750		Sampling plan
	Method	Conditions	
Subgroup 1			22 devices c = 0
Temperature cycling	1051	500 cycles, condition C, - 55°C to +175°C.	
Hermetic seal	1071		
Electrical measurements		See table I, subgroup 2 herein.	
Subgroup 2			22 devices c = 0
Steady-state dc blocking life	1038	1,000 hours, condition A, V_R = 80 percent of V_{Rated}.	
Electrical measurements		See table I, subgroup 2 herein except for thermal impedance.	
Subgroup 3			3 devices, c = 0
DPA	2101		
Subgroup 4			
Thermal impedance curves		Each supplier shall submit their (typical) max design maximum thermal impedance curves. In addition, the optional test conditions and thermal impedance limit shall be provided to the qualifying activity in the qualification report.	
Subgroup 5			22 devices c = 0
Barometric pressure, reduced (altitude operation)	1001	V_R = rated V_R (see 1.3); Pressure = 33 mmHg; t = 1 minute (minimum), R_{ISO} = 2.0 x 10^6 ohm max.	
* Subgroup 6			
Not applicable		See E.4.2.1 of MIL-PRF-19500.	
Subgroup 8			22 devices c = 0
Forward surge	4066		
Electrical measurement		See table I, subgroup 2 herein.

5. PACKAGING

5.1 Packaging. For acquisition purposes, the packaging requirements shall be as specified in the contract or order (see 6.2). When actual packaging of materiel is to be performed by DoD or in-house contractor personnel, these personnel need to contact the responsible packaging activity to ascertain packaging requirements. Packaging requirements are maintained by the Inventory Control Point's packaging activities within the Military Service or Defense Agency, or within the Military Service's system commands. Packaging data retrieval is available from the managing Military Department's or Defense Agency's automated packaging files, CD-ROM products, or by contacting the responsible packaging activity.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The notes specified in MIL-PRF-19500 are applicable to this specification.

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number, and date of this specification.

b. Packaging requirements (see 5.1).

c. Lead finish (see 3.4.1).

d. Product assurance level and type designator.

6.3 Qualification. With respect to products requiring qualification, awards will be made only for products which are, at the time of award of contract, qualified for inclusion in Qualified Manufacturers List (QML 19500) whether or not such products have actually been so listed by that date. The attention of the contractors is called to these requirements, and manufacturers are urged to arrange to have the products that they propose to offer to the Federal Government tested for qualification in order that they may be eligible to be awarded contracts or orders for the products covered by this specification. Information pertaining to qualification of products may be obtained from Defense Supply Center, Columbus, ATTN: DSCC/VQE, P.O. Box 3990, Columbus, OH 43218-3990 or e-mail vqe.chief@dla.mil.

6.4 Interchangeability information. MIL-PRF-19500/616 is a dual TO-254 package version of MIL-PRF-19500/478, which is a stud package version.

6.5 Changes from previous issue. The margins of this specification are marked with asterisks to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.
