COMMERCIAL ITEM DESCRIPTION

CAP, OPERATING, SURGICAL (Woman's)

The General Services Administration has authorized the use of this commercial item description as a replacement for VA Specification X-1555D.

This commercial item description describes a disposable operating cap which is for one-time wear by operating room personnel and personnel assigned to isolation areas.

Salient characteristics. Cap, Operating, Surgical (Woman's), disposable, shall be circular in shape, not less than 53.34 cm before sewn, with covered elastic, machine stitched under tension along the circular edge, producing slight uniform gathering to bring the 53.34 cm diametric measurement down to about 30.48 cm in diameter with ends of elastic to be overlapped in distance not less than 1.27 cm and by a continuous operation the machine stitching to affix the elastic to the fiber over-stitching and over-lapped ends of the elastic to prevent them from being torn from the fiber.

Material. Shall be produced of any soft, non-irritating, blue or green, lint free nonwoven or spun bonded polypropylene commonly used in the commercial market for such caps when sold in the private sector. The material shall be sufficiently flame retardant to meet the requirements of the Flammable Fabrics Act.

Elastic. One strand line rubber, white, round and covered.

Workmanship. The cap shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Case (500). One case containing five hundred caps constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract of purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the government. The government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with this commercial item description requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of S-1.

Finished cap measurement test. Slash elastic at intervals of approximately .64 cm to allow sample to lay flat on table top. Measure diameter of cap in flat position. Measurement shall be 53.34 cm plus or minus 1.27 cm or shipment shall be rejected.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling and marking. Unless otherwise specified, preservation, packaging and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE. The following National Stock Number is covered by this document:

NSN	NOMENCLATURE
6532-00-122-0468	CAP, OPERATING, SURGICAL (Woman's)

Copies of Federal Standard No. 376, Preferred Metric Units for General Use by the Federal Government and MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20420.

Ordering data. Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:
