DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503

1 TITLE	2 IDENTIFICATION NUMBER
Flight Flutter Test Report	DI-MISC-81388

3 DESCRIPTION / PURPOSE

3.1 This report demonstrates compliance with flutter safety requirements (aeroelastic and aeroservoelastic). The principal use is to provide a record of all flight flutter testing performed.

4 APPROVAL DATE (YYMMDD)	5 OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a DTIC APPLICABLE	6b GIDEP APPLICABLE
940211	F/ASC-ENFSL		

7 APPLICATION / INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete work task requirement as delineated in the contract.

7.2 This DID is applicable in any contract where a flight flutter test is required.

7.3 This DID supersedes DI-T-30733.

8 APPROVAL LIMITATION	9a APPLICABLE FORMS	9b AMSC NUMBER
		F7000

10 PREPARATION INSTRUCTIONS

10.1 Format. Contractor format is acceptable.

10.2 Content.

10.2.1 This report shall contain the following:

a. Air vehicle configuration.

b. Excitation method description.

c. Test procedures.

d. Test point conditions including altitude, Mach number, equivalent airspeed in knots, and load factor, n, if in an accelerated condition.

e. Methods of data reduction.

(Continued on Page 2)

11 DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:46Z
Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

f. Typical time traces of excitation and response.

g. Frequency and damping, g, of modes tracked or investigated.

h. Evaluation of test results by the flutter engineers.

10.2.2 Presentation of results shall include:

a. For each configuration, a plot of altitude versus Mach number with curves of constant equivalent airspeed, the design limit speed envelope of the vehicle, and flutter test points investigated.

b. Plots of damping coefficient, g, and frequency versus airspeed for the modes investigated at a constant altitude and for a given test configuration.
