DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503

1 TITLE	2 IDENTIFICATION NUMBER
Flutter Model Test Report	DI-MISC-81389

3 DESCRIPTION/PURPOSE

3.1 This report provides a record of experimental flutter characteristics and degree of accuracy as to model simulation of actual vehicles. The principal use is to investigate overall vehicle design characteristics as well as specific problem areas, particularly areas which do not lend easily to analysis. Also, test results when correlated with corresponding theoretical results validates the methods used in the actual air vehicle flutter analysis.

4 APPROVAL DATE (YYMMDD)	5 OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a DTIC APPLICABLE	6b GIDEP APPLICABLE
940211	F/ASC-ENFSL		

7 APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This DID is applicable in any contract where a flutter model test is required.

7.3 This DID supersedes DI-T-30732.

8 APPROVAL LIMITATION	9a APPLICABLE FORMS	9b AMSC NUMBER
		F7001

10 PREPARATION INSTRUCTIONS

10.1 Format. Contractor format is acceptable.

10.2 Content.

10.2.1 This report shall contain the following:

a. Date and place of tests.

b. Model design scale factors (or ratios) of the model parameters as compared to similar parameters of the full scale vehicle.

c. Photographs of representative models and of the model support.

d. Results of tests used to check that the model does simulate the air vehicle.

e. Test conditions.

(Continued on Page 2)

11 DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:47Z
Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

f. Mode and frequency of flutter encountered if flutter occurs.

g. Comparisons of test results with corresponding theoretical results.

10.2.2 Presentation of results shall include:

a. Plots showing the wind tunnel characteristics and indicating the flutter boundary that must be attained (including the flutter margin).

b. Plots of flutter speed and frequency versus the variation in important parameters.

c. Plots of the damping coefficient, g, and the frequency versus velocity if transients are measured.
