DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
Analytical Condition Inspection Report	DI-MISC-81391

3. DESCRIPTION / PURPOSE

3.1 This report provides a description of structural and system inspection findings.

3.2 This report will be used to document the inspection performed and pertinent aircraft identifying information, describe the condition observed, and provide the engineering activity a basis for the review and evaluation of the structural and system inspection program.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
940330	F/10		

7. APPLICATION / INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This DID is applicable when contractors are responsible for maintaining custodial records for government property being inspected or repaired.

7.3 Reference documents may be obtained as specified in the contract. or OPR listed in block 5.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		F7004

10. PREPARATION INSTRUCTIONS

10.1 Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

10.2 Format and content. Contractor format is acceptable. The report shall consist of three parts as follows:

10.2.1 Part A. This part records the following pertinent aircraft identifying information:

a. Aircraft mission, design, and series
b. Aircraft serial number
c. Base assigned
d. Type project (programmed depot maintenance, analytical condition inspection, controlled interval extension, or other designated inspection)
e. Inspecting activity
f. In work date
g. Last programmed depot maintenance date
h. Flight hours
i. Damage index or tracking factor
j. Flight hours

(Continued on Page 2)

11. DISTRIBUTION

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Block 10, Preparation Instructions (Continued)

k. Flying hours
l. Damage index or tracking factor
m. Sequence data (The last two numerals from the fiscal year during which the work is being accomplished and the sequence number reflecting aircraft input position for that year.)

10.2.2 Part B. This part records the following results of each analytical condition inspection performed:

a. Work specification paragraph (The identification which best describes the inspection or inspection area.)
b. Inspection task number
c. Defect classification (0 (zero) for critical defect 1 (one) for major defect, 2 (two) for minor defect, and 3 (three) for satisfactory as inspected.)
d. Part number (Corresponding to the item causing defect condition.)
e. Work unit code (Corresponding to the item causing defect condition.)
f. Number of loose fasteners
g. Number of missing fasteners
h. Buckling observed ("X" if area inspected has bent skin, bent tubing or distorted metal. Part C shall include a detailed explanation.)
i. Out of tolerance condition observed ("X" if part or area is worn, out of calibration, elongated, etc. Part C shall include a detailed explanation.)
j. Surface corrosion observed ("X" if area has corrosion less than 0.005 in depth. Part C shall include a detailed explanation.)
k. Severe corrosion observed (Depth of corrosion(0.00). Part C shall include a detailed explanation.)
l. Cracks observed (Lenth of crack (0.00). Part C shall include a detailed explanation.)
m. Type protection observed (type of protection: "P" for paint, "A" for anodize, and "S" for sealant)
n. Marring observed (type of mar: "G" for gouged, "S" for scratched, and "C" for chipped)
o. How Mal (how malfunctioned) code (taken from -06 handbook)
p. Action taken (taken from -06 handbook)
q. Delaminated ("X" if item is delaminated. Explain in detail in an attached narrative.)
r. Station number (position of part in block d if blocks h, i, j, k, l, m, n, or q are marked)
s. Photos (Where necessary to show conditions. If photos are used, an "X" and photo number referenced in part C.)
t. X-rays (Where necessary to show conditions. If X-rays are used, an "X" and X-ray number referenced in part C.)
u. Name, organization and phone number of inspector.

10.2.3 Part C. Corresponding narrative information to part B.
