DATA ITEM DESCRIPTION

Title: CERTIFICATION REQUIREMENTS PLAN (CRP)

Number: DI-NUOR-81409A

Approval Date: 20130201

AMSC Number: F9326

Limitation: N/A

DTIC Applicable: N/A

GIDEP Applicable: No

Preparing Activity: 27 (AFNWC)

Applicable Forms: N/A

Use/Relationship: The CRP defines the process and structure for the nuclear certification of a weapon, weapon system, subsystem, and associated software, hardware, procedures, personnel, support equipment, and facilities. The CRP defines all of the activities and tasks that must be accomplished for nuclear safety and compatibility certification of the weapon system. In addition, it defines the action agencies, and the nuclear certification schedule associated with the tasks identified in the CRP

a. There are two different CRP formats that are provided by the Air Force Nuclear Weapons Center (AFNWC)/NCS, the Abbreviated CRP and the Full CRP. The Abbreviated CRP is intended for a change to a nuclear certifiable item that will result in minor nuclear certification requirements, often involving action by single agencies. An example of a minor certification effort that would merit the use of the abbreviated format is a minor software update. The Full CRP is intended for nuclear certification efforts that are more complex, often requiring actions from multiple agencies. The decision to use the Abbreviated or Full CRP format is determined by AFNWC/NCS, the preparer of the Basic CRP.

b. This Data Item Description (DID) contains the format and content preparation instructions for the CRP, as described in Air Force Instruction (AFI) 63-125, *Nuclear Certification Program*.

(Copies of the AF Instruction are available online at http://www.e-publishing.af.mil/.)

c. This DID supersedes DI-NUOR-81412, Software Certification Plan (SCP).

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices and revisions, shall be as cited in the ASSIST database, https://assist.dla.mil, at the time of the contract.

2. Format. Contractor must use either the Abbreviated or Full CRP Templates in the Basic CRP. The Basic CRP is prepared by AFNWC/NCS.

3. Content. The Nuclear Certification Impact Statement (NCIS) (see DI-NUOR-81888), shall provide a description of the new/modified system hardware/software/process and an evaluation of the potential for a nuclear certification impact and also provide the data necessary for the Process Owners to evaluate what certification requirements must be met for the weapon system to be included in the Basic CRP that is prepared by AFNWC/NCS. The Basic CRP is then sent to the System Program Manager (SPM) who provides the specific information, (the how and when) to complete the tasks identified in the Basic CRP, and generates the Final CRP.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The Abbreviated CRP format shall be used for nuclear certification efforts that will result in minor nuclear certification requirements. The Full CRP is intended for nuclear certification efforts that require involvement of multiple agencies to accomplish nuclear certification for a significant modification of an existing weapon system or complex weapon system development.

3.1 Abbreviated CRP Format. The Abbreviated CRP Template is provided by the AFNWC/NCS as guidance. To aid in the understanding of the nuclear certification requirements, supplementary information can be attached to the Abbreviated CRP Template.

3.1.1 Abbreviated CRP Template. The Abbreviated CRP Template provides sections for and shall include the following information:

a. Executive Summary:
    (1) Objective
    (2) Design Certification Requirements
    (3) Operational Certification Requirements
    (4) Release Case
    (5) Key Dates
    (6) Key Documents
    (7) Acronyms and Abbreviations

b. Overview:
    (1) Background
    (2) Purpose/Objective
    (3) Functional Description

c. Nuclear Certification Requirements:

d. List of Tables:
    (1) Table 1 - Nuclear Certification Task Summary
    (2) Table 2 - Master Nuclear Certification List Hardware Changes
    (3) Table 3 - Master Nuclear Certification List Firmware/Software Changes

e. List of Figures

f. Appendices:
    (1) Appendix A - Schedule

3.2 Full CRP Format. A Full CRP shall be derived from the Full CRP Template which is provided as guidance and shall be tailored as needed to adequately describe the certification requirements. Additional information such as: deviations, technical data, etc. can be included in additional Appendices.

3.2.1 Full CRP Template. The Full CRP Template provides sections for and shall include the following information:

Check the source to verify that this is the current version before use.

a. Executive Summary:
    (1) Key Dates
    (2) Key Documents
    (3) Release Case
    (4) Description
    (5) Design Certification Requirements
    (6) Operational Certification Requirements
b. Nuclear Certification Process Synopsis:
    (1). Nuclear Certification
    (2) Design Certification
    (3) Operational Certification
c. Overview:
    (1) Background
    (2) Purpose and Objectives
    (3) Functional Description
d. Applicable Guidance:
    (1) Government Documents
    (2) Non-Government Documents
e. Acronyms and Abbreviations
f. Nuclear Certification Requirements
g. List of Tables:
    (1) Table 1 - Nuclear Certification Task Summary
    (2) Table 2 - Master Nuclear Certification List Hardware Changes
    (3) Table 3 - Master Nuclear Certification List Software/Firmware Changes
h. List of Figures
i. Appendices:
    (1) Appendix A - Schedule
    (2) Appendix B - Compatibility Certification
    (3) Appendix C - Safety Design Certification
    (4) Appendix D - Rules Development
    (5) Appendix E - Technical Data Certification
    (6) Appendix F- Operational Certification
4. End of DI-NUOR-81409A.
