MIL-C-43508
20 June 1967

MILITARY SPECIFICATION

COLLAR, DOG, CHOKE CHAIN

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers one type and size of dog collar.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bids or request for proposal form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

QQ-W-461	-	Wire, Steel, Carbon, (Round, Bare and Coated)
QQ-Z-325	-	Zinc Coating, Electrodeposited, Requirements For
RR-C-271	-	Chains and Attachments, Welded, Weldless, and Roller Chain
PPP-B-636	-	Box, Fiberboard

STANDARDS

MILITARY

MIL-STD-105	-	Sampling Procedures and Tables for Inspection by Attributes
MIL-STD-129	-	Marking for Shipment and Storage

(Copies of specifications, standards and drawings required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Preproduction sample.- Unless otherwise specified (see 6.2), before production is commenced, a sample dog collar covered by this specification shall be submitted or made available to the contracting officer or his authorized representative for approval in accordance with 4.2. The approval of the preproduction sample authorizes the commencement of production, but does not relieve the supplier of responsibility for compliance with all applicable provisions of this specification. The preproduction sample shall be manufactured in the same facilities to be used for the manufacture of the production items.

3.2 Materials and components.-

3.2.1 Chain, twist link.- The chain shall conform to type I, grade C, class 5, style 2, 9/64 inch of RR-C-271.

3.2.2 Rings.- The rings shall be fabricated from steel wire conforming to steel number 1020, finish 1, hard of QQ-W-461. The rings shall be of the design and dimensional requirements specified on Drawing 4-1-71.

3.3 Construction.- The construction shall conform in all respects to Drawing 4-1-71 and as specified herein.

3.3.1 Welding.- Welds shall be sound, smooth and free from porosity, cracks, incomplete fusion and deformation of material.

3.4 Finish.- After complete assembly, the collar shall have all rough and sharp edges removed. The collar shall then be given an electrodeposited zinc coating conforming to type II or III, class 2 of QQ-Z-325.

3.5 Workmanship.- The assembled collar shall be free from any fracture, crack, break, split or puncture with no parts malformed, dented, buckled, or bent out of shape.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection.- Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right

Check the source to verify that this is the current version before use.

to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Preproduction sample inspection.- When a preproduction sample is required, it shall be examined for the defects listed in table I and dimensions specified.

4.3 Sampling for inspection shall be performed in accordance with the provisions set forth in MIL-STD-105, unless otherwise indicated hereinafter.

4.3.1 Component and material inspection.- In accordance with 4.1 above, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings and standards unless otherwise excluded, amended, modified or qualified in this specification.

4.3.2 End product inspection.- The lot shall consist of all completely fabricated collars offered for inspection at one time. The sample unit shall be one completely fabricated collar.

4.3.2.1 Visual examination.- Visual examination shall be made of the dog collar for the defects in table I. The inspection level shall be level II and the acceptable quality level (AQL) expressed in terms of defects per hundred units shall be 2.5.

TABLE I.- Classification of Defects

Examine	Defect
Finish	Any rough or sharp edge (rough or sharp edges may be detected by drawing collar slowly through partially closed fist)
General construction and workmanship	Any component wrong type, design or shape Improper assembly Any fracture, crack, break, split or puncture Any part malformed, dented, buckled, or bent out of shape Any part missing Any weld omitted or not smooth Any weld not sound (i.e., contains fissures, porosity, or holes)

Check the source to verify that this is the current version before use.

4.3.2.2 Dimensional examination.- Inspection shall be made of the dog collar for dimensions specified. Any deviation from specified requirements shall constitute a defect. The inspection level shall be S-2 and the AQL shall be 4.0 defects expressed in terms of defects per hundred units.

4.3.3 Examination of preparation for delivery requirements.- An examination shall be made to determine that packaging, packing and marking requirements are in compliance with section 5 of this specification. Defects shall be scored in accordance with table II. The lot shall be the number of shipping containers offered for delivery at one time. The sample unit shall be one shipping container fully prepared for delivery with the exception that it need not be sealed. Defects of closure listed below shall be examined on shipping containers fully prepared for delivery. The inspection level shall be S-2 and the AQL, expressed in terms of defects per hundred units, shall be 2.5.

TABLE II.- Examination of preparation for delivery

Examine	Defect
Marking	Omitted, incorrect, illegible, of improper size, location, sequence or method of application
Materials	Any component missing Any component damaged
Workmanship	Inadequate application of components, such as incomplete closure of container flaps, loose strapping
Contents	Number per container is more or less than required

5. PREPARATION FOR DELIVERY

5.1 Packaging.- Packaging shall be level A or C as specified (see 6.2).

5.1.1 Level A.- Twenty-five collars shall be compactly packaged in a snug-fitting fiberboard box conforming to style RSC, type CF, variety SW, or type SF, class domestic of PPP-B-636. Closure shall be in accordance with the appendix of PPP-B-636.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T21:35Z
Check the source to verify that this is the current version before use.

5.1.2 Level C.- Collars shall be packaged to afford adequate protection against damage during shipment from the supply source to the first receiving activity. The supplier may use his standard practice when it meets this requirement.

5.2 Packing.- Packing shall be level A, B or C as specified (see 6.2).

5.2.1 Level A.- One hundred collars, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, V3s of PPP-B-636. Closure, waterproofing by means of tape and reinforcing with flat strapping or tape banding, shall be in accordance with the appendix of PPP-B-636.

5.2.2 Level B.- Unless otherwise specified (see 5.2.2.1), one hundred collars packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, variety SW, or type SF, class domestic of PPP-B-636. Closure shall be in accordance with method II of the appendix of PPP-B-636.

5.2.2.1 When specified (see 6.2), the shipping container shall conform to style RSC, V3c, or V3s of PPP-B-636.

5.2.3 Level C.- Collars, packaged as specified in 5.1, shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with rules or regulations of carriers applicable to the mode of transportation.

5.3 Marking.- In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use.- The dog collar covered by this specification is used for obedience training and for controlling a dog when moving from one area to another.

6.2 Ordering data.- Procurement documents should specify the following:

a. Title, number and date of this specification
b. When preproduction sample is not required (see 3.1)
c. Selection of the applicable levels of packaging and packing (see 5.1 and 5.2)
d. When V3c or V3s fiberboard is required for level B shipment (see 5.2.2.1)

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
