COMMERCIAL ITEM DESCRIPTION

DESSERT POWDER (GELATIN) AND GELATIN, PLAIN, EDIBLE

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Types I and II of Federal Specification C-D-221.

This Commercial Item Description (CID) covers gelatin dessert powder and plain gelatin, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

The product shall conform to the following types and classes as specified in the solicitation, contract, or purchase order.

Types.

Type I - Gelatin, plain, edible
Type II - Dessert powder, gelatin
Type III - Dessert powder, gelatin, dietetic

Classes.

Class 1 - Cherry flavor
Class 2 - Lemon flavor
Class 3 - Lime flavor
Class 4 - Orange flavor
Class 5 - Raspberry flavor
Class 6 - Strawberry flavor

Type I shall be high quality ground gelatin with a moisture content not more than 13.0 percent. In hot solution, the gelatin shall be clear and of light color and shall have no foreign odor or taste. The jelly strength shall be not less than 225 g when tested in accordance with the Official Methods of Analysis of the Association of Official Analytical Chemists.

Type II shall be uniformly blended, dry mixtures prepared from food grade materials and compounded using good manufacturing practices. The ingredients shall include gelatin, sweetener, acidulant, salt, buffers, FD&C certified color, natural or artificial flavor or the combination thereof, and other ingredients. The dessert powders shall be free-flowing, homogenous, free from lumps,

and contain not more than 2 percent moisture. The gelled dessert shall be firm and tender. It shall not be soft, runny, tough, or rubbery. The prepared gelatin dessert shall have a color, flavor, and aroma characteristic of the flavor it represents.

Type III shall be uniformly blended, dry mixtures prepared from food grade materials and compounded using good manufacturing practices. The ingredients shall include gelatin, aspartame, acidulant, salt, buffers, FD&C certified color, natural or artificial flavor or the combination thereof, and other ingredients. The sweetener, acidulant, and buffers shall be of Food Chemicals Codex grade. The dessert powder shall be free-flowing, homogenenous, free from lumps, and contain not more than 5 percent moisture. The gelled dessert shall be firm and tender. It shall not be soft, runny, tough, or rubbery. The prepared gelatin dessert shall have a color, flavor, and aroma characteristic of the flavor it represents.

Analytical requirements.

Chemical analyses shall be made in accordance with the following methods in the latest edition of the Official Methods of Analysis of the Association of the Official Analytical Chemists:

Test	Chapter and Section	Method
Jelly Strength	Chapter: Gelatin, Dessert Preparations, and Mixes Section: Gelatin	Jelly Strength
Moisture (gelatin)	Chapter: Cereal Foods Section: Wheat Flour	Vacuum Oven
Moisture (dessert powder)	Chapter: Sugars and Sugar Products Section: Sugars and Sirups	Vacuum Drying

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the Unites States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the solicitation, contract, or purchase order, the Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, will determine the quality assurance of the gelatin dessert powder and plain gelatin according to the Processed Products Branch procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The gelatin dessert powder and plain gelatin shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. Eight ounces of Type I product, three or twenty-four ounces of Type II product shall be packaged in accordance with good commercial practice.

B. Commercial packing. Packages of product shall be packed in a fiberboard box complying with the Uniform Freight Classification or National Motor Freight Classification.

C. Export packaging. Twenty-four ounces of product shall be packaged in a size 401 x 411 open-top style, round, metal can with soldered or welded side seam and compound-lined, double-seamed ends. The can shall be made throughout from not less than 0.25 pound-per-base box electrolytic tinplate. The can shall have sufficient base plate weight temper to protect the product during shipment and storage.

Check the source to verify that this is the current version before use.

D. Export packing. Twenty-four cans of product of one flavor shall be packed in a snug-fitting fiberboard box constructed and closed in accordance with Style RSC, Grade V3c, V3s, or V4s of PPP-B-636. The cans shall be packed on end, four in length, three in width, and two in depth within a container. The tiered cans shall be separated with a full length and width fiberboard pad made of the same material as the box.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, the strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.

F. Labeling (commercial and export). Commercial labeling shall be acceptable.

G. Marking (commercial and export). Marking of shipping containers and unit loads shall be in accordance with MIL-STD-129.
