COMMERCIAL ITEM DESCRIPTION

DISPENSER, COMPRESSIBLE BOTTLE, CONDIMENT

The General Services Administration has authorized the use of this commercial item description in preference to MIL-D-21757.

1. ABSTRACT

1.1 Abstract. This commercial item description covers the following two sizes of plastic, compressible, two component, condiment dispenser bottles:

Size 1 - 8 fluid ounce
Size 2 - 12 fluid ounce

2. SALIENT CHARACTERISTICS

2.1 Design and construction. The condiment dispenser shall consist of a body and conical cap/cover fabricated from a polyethylene or similar plastic material. The body shall have a minimum inside diameter of 3/4-inches and the cap shall have a conical spout terminating in the dispensing orifice with the opposite end containing a shoulder utilizing one or two complete female threads. The top of the body shall have a male thread that engages the female threaded portion of the cap in a way that ensures a snug fit. The following essential characteristics shall also apply to the condiment dispenser:

(1) It shall be designed so that dispensing occurs when the condiment dispenser is inverted and pressure applied to both sides of the body. Upon release of pressure, the condiment shall cease flowing from the cap.

(2) It shall be designed to adhere to the following deformation test: Fill the samples with water and completely immerse them in a suitable container. The dispensers shall not be in contact with each other or the

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any other data which may improve this document should be sent by letter to: Commander, U.S. Army Natick Research, Development, and Engineering Center, ATTN: SATNC-WEE, Natick, MA 01760-5018.

AMSC N/A FSC 7350

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

container. The water shall be heated to 180°F and held at that temperature for 15 minutes. The samples shall then be removed and allowed to cool to room temperature. No evidence of permanent deformation shall occur.

(3) It shall be designed and constructed so that it is free of burrs, slivers, stains, discolorations, pits, bubbles, scratches, crevices, foreign inclusions or voids and that it is not adversely affected by soaps, detergents or chlorine.

(4) It shall be designed so that it is inherently hygienic, requiring minimal maintenance/cleaning when used in a dining facility environment.

(5) It shall hold, store, and dispense standard liquid condiments such as ketchup, honey, maple syrup, and mustard.

(6) It shall be easily refillable from a bulk supply.

(7) It shall be storable in a refrigerator at temperatures down to 33°F without detrimental effects on either the container or its contents.

(8) It shall be dishwasher safe at water temperatures to 212°F and the intended use of the dispenser shall not be adversely affected by hot water up to and including 212°.

2.2 Codes and Standards. The condiment dispenser shall conform to Federal Food, Drug and Cosmetic Act and Regulations Promulgated Thereunder: 21 CFR 121: Subpart F- Food Additives Resulting From Contact with Containers or Equipment and Food Additives Otherwise Affecting Food and the National Sanitation Foundation Standard No. C-2, Special Equipment and/or Devices.

2.3 Identification markings. The condiment dispensers shall be permanently and legibly marked with the manufacturer's identification marking. Use of "stick-on" or removable labels is prohibited.

3. QUALITY ASSURANCE

3.1 Certification. The contractor shall certify, and maintain substantiating evidence, that the product offered meets the salient characteristics and requirements of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

3.2 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerences specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other

requirements of this commercial item description are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerences specified in the inch-pound units, a request shall be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

3.3 Regulatory requirements In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, without adversely affecting performance requirements, or exposing supplier's employees to undue hazards from the recovered materials, in accordance with Public Law 94-580, to the maximum extent practicable. The term "recovered materials" means materials which have been collected or recovered from solid waste and reprocessed to become a source of raw materials as opposed to virgin raw materials. None of the above shall be interpreted to mean that the use of used or rebuilt products are allowed under this commercial item description unless otherwise specified.

3.4 National Sanitation Foundation (NSF). Acceptable evidence of meeting the requirements of NSF shall be one of the following:

(1) A listing in the current edition of the NSF "listing of Food Service Equipment" and display of the NSF seal on the finished unit.

(2) A certification of the dispenser units issued by NSF under their special one-time contract evaluation/certification service.

(3) A certified test report from a recognized independent testing laboratory acceptable to the Government agency for which the dispenser units are being procured that the units have been tested and conform to NSF No. 18.

4. PACKAGING

4.1 Packaging. Twelve dispensers shall be packaged in a snug fitting intermediate box fabricated from domestic grade fiberboard.

4.2 Packing. The dispensers shall be packed in accordance with ASTM 3951.

4.3 Marking. Marking of intermediate packs and shipping containers shall be in accordance with MIL-STD-129.

5. NOTES

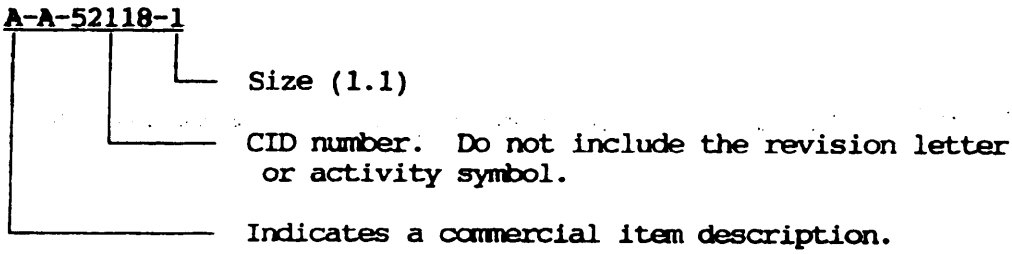

5.1 Intended use. Dispensers are intended to be used for the dispensing of mustard, ketchup, and similar condiments. Mayonnaise shall not be used as a condiment in this dispenser.

5.2 Ordering data. Acquisition documents should specify the following:

a. Title, number, and date of this document.
b. Size of dispensers required (1.1).
c. Type of packaging and packing required (see 4.1).

5.3 CID based part identification number. The following part identification numbering procedure is for Government purposes and does not constitute a requirement for the contractor:

5.4 Supersession data. The compressible bottle condiment dispenser previously covered by Military Specification MIL-D-21757 is available from this Commercial Item Description.

5.5 Sources of documents.

5.5.1 Sources of nongovernment association documents.
