COMMERCIAL ITEM DESCRIPTION

TABLET, CHLORINE, FLOCCULATING, EMERGENCY WATER PURIFICATION

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description (CID) covers a chlorine flocculating emergency water purification tablet, packed in commercially acceptable containers, suitable for use by the Federal Government. The tablet is intended to clarify and disinfect polluted water to make it microbiologically safe for drinking. The tablet is recommended for use in situations where municipally treated water is not provided or where the available water is suspected of being polluted.

Salient characteristics.

The tablets shall contain a chlorine disinfectant and a combination of flocculating and coagulating agents which promote rapid formation of a sediment in the polluted water. Each tablet shall weigh 600-1000 mg. The active ingredient shall be sodium dichloro-s-triazinetrione (sodium dichloro isocyanurate) at a level 11-15 milligrams per tablet. When used according to label instructions, the tablet(s) shall provide 7 to 9 parts per million free available chlorine and enough flocculating agents to clarify and disinfect 1 liter (1.10 quarts) of polluted water at 41°F (5°C) and above. The tablets shall be certified and registered by the U.S. Environmental Protection Agency (EPA) for emergency treatment of water for human consumption. The tablets shall be certified to have a stable shelf life of not less than two years at 41-77°F (5-25°C).

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Commander, U.S. Army Natick Research, Development, and Engineering Center, ATTN: SATNC-WTP, Natick, MA 01760-5018.

Analytical requirements.

Chemical analysis for available chlorine shall be made in accordance with Chlorine (Residual)/ Amperometric Titration Method or equivalent method of the American Public Health Association Methods for the Examination of Water and Waste Water.

Contractor's certification.

The contractor shall certify, and maintain objective quality evidence, that the product offered meets this commercial item description, and that the product conforms to the producer's own specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. The delivered product shall conform with all applicable provisions of the Federal Food, Drug, and Cosmetic Act, the Federal Insecticide, Fungicide, and Rodenticide Act, and regulations promulgated thereunder. The offeror/contractor is encouraged to use recovered materials in accordance with public law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking.

The water purification tablets shall be preserved, packaged, packed, labeled and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements (Only).

The following requirements are applicable when specified by the contracting officer:

A. Packaging (commercial and export). Each tablet shall be sealed in a heat sealed laminated pouch. The pouch material shall be a three-ply material made by laminating, from outside to inside, 25 to 30 pounds basis weight (24 by 36-500) kraft or sulfite paper, 0.00035 to 0.0005 inch thick aluminum foil, and 0.002 inch to 0.003 inch thick polyethylene. The material shall show no evidence of delamination after heat sealing. Twelve tablets shall be

strip packaged in individual, 1 inch by 1 inch packets, and heat sealed with seals not less than 1/8 inch wide. The overall dimensions of the strip package shall not exceed 7-3/4 inches by 3 inches. When specified, the complete exterior surface of the pouch shall be uniformly colored in the range of green 34079 through 34087 or 24052 through 24087 or brown 30045 through 30118 (excluding 30109) or 10045 of FED-STD-595.

B. Commercial packing. Three hundred packages containing 12 tablets shall be packed in fiberboard shipping containers in accordance with the National Motor Freight Classification or Uniform Freight Classification, as applicable, except metal fasteners shall not be used in the final closure of the fiberboard shipping containers.

C. Export packing. Three hundred packages containing 12 tablets shall be packed in a fiberboard shipping container, constructed, closed and reinforced in accordance with Style RSC-L, Grade V3c of PPP-B-636. Pads shall be placed on the bottom and on the top of the shipping container. The approximate dimensions of the box shall be 9-3/4 inches in length, 16 inches in width and 8-1/4 inches in depth. Each shipping container shall be reinforced with nonmetallic strapping or pressure sensitive adhesive, filament-reinforced tape.

D. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, the strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.

E. Labeling (commercial and export). The strip package with 12 water purification tablets shall be labeled in accordance with EPA guidelines and with the following information:

EMERGENCY DRINKING WATER TABLETS

CAUTION
HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

Tablets may be harmful if swallowed. Avoid contact with skin, eyes, or clothing. Contact with eyes, skin and mucous membranes will cause irritation. If tablets are swallowed, drink a glass of milk or water. In case of contact with eyes, flush thoroughly with water, and call or see a physician.

DIRECTIONS FOR USE: FOR EMERGENCY TREATMENT OF POLLUTED WATER

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Check the source to verify that this is the current version before use.

USE DIRECTIONS

TEMPERATURE OF WATER	NUMBER OF TABLETS	WAITING PERIOD AFTER STEP 5
77°F (25°C)	1	15 minutes
59°F (15°C)	1	15 minutes
50°F (10°C)	1	15 minutes
41°F (5°C)	2	15 minutes

1. Add 1 or 2 tablet(s) to 1 liter (1.1 quarts) of water as directed in the table above.

2. Agitate or shake for 1 minute or until the tablet(s) is/are completely disintegrated.

3. Swirl for a few seconds.

4. Set aside for 4 minutes.

5. Swirl for 10 seconds.

6. Wait 15 minutes as specified above; then strain through a piece of cloth (preferably cotton flannelette) in clean container. The clarified water is now ready for drinking. If the filtered water is still murky, add an additional half tablet and repeat steps 2 through 6.

IMPORTANT: DISCARD SEDIMENT BETWEEN USES, RINSE CLOTH THOROUGHLY WITH TREATED WATER. ALWAYS USE SAME SIDE OF CLOTH AS TOP SIDE FOR STRAINING.

STORAGE AND DISPOSAL: Store tablets in sealed containers away from excessive heat or direct sunlight. Discard empty bag or tablet wrappers in a suitable trash collector.

NET WEIGHT: ___ grams (12 ___-milligram tablets)

F. Marking. Shipping containers shall be marked in accordance with MIL-STD-129.

G. Bid sample approval. Unless otherwise specified by the contracting officer, four 12-tablet packages of product that the contractor proposes to furnish, packaged in accordance with the document requirements, shall be

submitted to the U.S. Army Natick Research, Development, and Engineering Center, (ATTN: STRNC-WAB), Natick, MA 01760-5018 for bid sample evaluation. Four duplicate 12-tablet packages of product shall be retained by the contractor and, when the bid sample is approved, the duplicate packages shall be used for comparability in determining the acceptance of intended delivery product. Bid samples must meet all document requirements prior to being submitted for evaluation. The approval of any bid sample will not constitute approval of the sample as meeting the other requirements of this document.
