COMMERCIAL ITEM DESCRIPTION

PIN, NET, LAUNDRY, (5-INCH)

The General Services Administration has authorized the use of this commercial item description in perference to Federal Specification FF-P-419.

1. CLASSIFICATION

1.1 Scope. This commercial item description covers one type and size of laundry net pin.

2. SALIENT CHARACTERISTICS

2.1 Materials. The materials used in the manufacture of laundry pins shall be of the quality normally used by the manufacturer for pins, providing that the completed item complies with all the provisions of this commercial item description.

2.1.1 Sheet and strip. Sheet and strip shall be alloy not less than 0.034 inch in thickness. The material shall conform to ASTM B 36 alloy number C26000 or C26800.

2.1.2 Wire. The wire shall be copper alloy conforming to ASTM B 134 alloy number C26000 or C27000, having a diameter of 0.141 to 0.159 inches.

2.2 Construction. Pins shall conform to the dimensions shown in figure 1. The clasp shall be formed of the sheet and strip specified in 2.1.1. The wire body shall conform to the wire specified in 2.1.2, and shall have a blunt point.

Beneficial comments, (recommendations, additions, deletions) and any pertinent data which may be used in improving this document should be addressed to: U.S. Army Natick Research, Development, and Engineering Center, Natick, MA 01760-5017, by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

AMSC N/A FSC 3510

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

2.3 Finish and workmanship. Pins shall have a chromium or nickel finish evenly applied over all surfaces in accordance with the manufacturer's commercial practice. The pins, prior to finishing, shall be free of slivers, sharp edges, rough spots and all oil, grease and foreign matter.

3. QUALITY ASSURANCE

3.1 Certification. The contractor shall certify, and maintain substantiating evidence, that the product offered meets the salient characteristics and requirements of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

3.2 Metric product. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this Commercial Item Description are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

3.3 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practical.

4. PACKAGING

4.1 Packaging, packing and marking. The laundry net pins shall be packaged, packed, and marked in accordance with the domestic or oveseas requirements of ASTM D 3951, as applicable (see 5.2).

5. NOTES

5.1 Intended use. The laundry net pins are intended for closing laundry net bags. The blunt point precludes the use of these pins for other purposes.

5.2 Acquisition requirements. Acquisition documents must specify the following:

a. Title, number, and date of this document.
b. Type of packaging, packing, and marking required (see 4.1).
