INTERIM FEDERAL SPECIFICATION

WIRE, STEEL, CORROSION (AND HEAT) RESISTING COLD HEADING AND COLD FORGING

(This Interim Federal Specification was developed by the General Services Administration, Federal Supply Service, based upon currently available technical information, but has not been approved for promulgation as a regular Federal Specification. It is subject to modification, and, pending its promulgation as a regular coordinated Federal Specification, may be used in procurement.)

1. SCOPE AND CLASSIFICATION

1.1 Scope. - This specification covers round corrosion and heat resisting steel wire up to 1/2 inch, inclusive, in diameter, for cold heading in the manufacture of bolts, nuts, nails, rivets, screws, and for cold forging of armament, automobile, household, machine, railroad equipment, etc., parts.

1.2 Classification. - Round, corrosion and heat resisting steel wire shall be furnished in the following compositions, conditions and finishes, as specified.

COMPOSITIONS (See 6.1 and 6.1.1):

TABLE I - CORROSION AND HEAT RESISTING STEELS
(By standard composition numbers, as listed in Federal Standard No. 66).

COMMON NAME	COMPOSITION NUMBER	COMMON NAME	COMPOSITION NUMBER
Chromium-Nickel-Corrosion and Heat Resisting (Stainless) Steels	302 303 304 305 309 310 316 317 321 347	Chromium Corrosion and Head Resisting (Stainless) Steels	403 410 414 416 420 430 431 440-A 440-B 440-C 446
Chromium-Nickel-Manganese Corrosion and Heat Resisting (Stainless) Steel	202		

CONDITIONS (See 6.2):

Type 1. - Soft temper.
Type 2. - Annealed temper.
