SUPERSEDING
Int. Fed. Spec. UU-P-00192 (GSA-FSS)
July 31, 1964

FEDERAL SPECIFICATION

PAPER, CARBONLESS TRANSFER

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers white, chemical wood bond, surface chemically coated front and back. Carbon not required.

1.2 Classification. Paper, carbonless transfer in accordance with this specification shall be of one grade and type.

1.2.1 *Size and trim-sheets.* The paper shall be furnished in the following size:

22-1/2 by 34-1/2 inches

Paper must be flat, square on four sides with smooth edges. Paper must not be undersize and not more than 1/8 inch oversize in either direction. Paper will be considered square if the variation between diagonals of the sheet does not exceed 1/16 inch.

1.2.2 *Color.* Paper, carbonless transfer shall be furnished in white.

2. APPLICABLE SPECIFICATIONS, STANDARDS, AND OTHER PUBLICATIONS

2.1 Specifications and standards. The following specifications and standards of the issues in effect on date of invitation for bids, form a part of this specification:

Federal Specification:

PPP-B-636—Box, Fiberboard.

Federal Standards:

Fed. Std. No. 102—Preservation, Packaging, and Packing Levels.

Fed. Std. No. 123—Marking for Domestic Shipment (Civilian Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Washington, D. C., Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles and Seattle, Wash.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL-STD-105—Sampling Procedures and Tables for Inspection by Attributes.

MIL-STD-129—Marking for Shipment and Storage.

(Copies of Military Specifications and Standards, required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following publications, of the issues in effect on date of

invitation for bids, form a part of this specification:

Technical Association of the Pulp and Paper Industry Publications:

T 401 m—Fiber Analysis of Paper and Paperboard.
T 402 m—Conditioning Paper and Paperboard for Testing.
T 409 m—Machine Direction of Paper.
T 410 m—Basis Weight of Paper and Paperboard.
T 411 m—Thickness and Density of Paper.

(Copies may be obtained from the Technical Association of the Pulp and Paper Industry, 360 Lexington Avenue, New York 17, N. Y.)

3. REQUIREMENTS

3.1 Material. Paper, carbonless transfer, shall be made from such material as to insure compliance with the requirements of this specification.

3.1.1 *Stock.* The paper shall be 100 percent chemical woodpulp.

3.1.2 *Weight.* The paper weight shall be 17 pounds basis 17 x 22—500 sheets. The variation shall be not more than 5 percent above or below the 500 sheet weight.

3.1.3 *Thickness.* The paper thickness shall be not less than 0.0032 inch nor more than 0.0042 inch.

3.1.4 *Grain.* The grain shall be in the short direction.

3.2 Curl. Paper must lie flat with either no tendency to curl or with a curl which can be overcome under reasonable working conditions.

3.3 Performance. The paper shall be coated with chemicals to effect transfer of image onto the underlying sheet. The top side of the sheet (face) shall be surface treated with a transmitting chemical. The bottom side of the sheet (back) shall be surface treated with a transmitting chemical. The paper, copy coated, shall be suitable for letterpress and offset production of multiforms requiring semiperformance.

3.4. Workmanship. Paper, carbonless transfer, shall be free from any defects which may impair its appearance or serviceability and shall be clean and free from lint, paper dust, grit, spots, wrinkles, folds, holes, tears, and other imperfections. The quality shall conform to the acceptable quality levels established in section 4, hereinafter.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 Inspection responsibility. The supplier is responsible for the performance of all inspection requirements specified herein. Except as otherwise specified, the supplier may utilize his own or any other inspection facilities and services acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.1.1 *Sampling for inspection and test.* Sampling for inspection and test shall be performed in accordance with the provisions set forth in MIL-STD-105, except where otherwise indicated.

4.2 Inspection of materials and components. In accordance with 4.1, the supplier is responsible for insuring that materials and components used were manufactured, examined, and tested in accordance with the requirements of referenced subsidiary specifications and standards to the extent specified, or, if none, in accordance with this specification. In the event of conflict, this specification shall govern.

4.3 Sampling, examination, and test. Paper, carbonless transfer offered for acceptance under this specification shall be sampled and inspected in accordance with the

Check the source to verify that this is the current version before use.

procedures outlined in MIL-STD-105. The sample size and acceptable quality levels (AQL's) shall be as listed in table I.

TABLE I

Paragraph	Sample unit	Inspection level	AQL
4.3.1	Shipping container	S-4	4.0 percent defective
4.3.2	Visual examination (paper)	S-4	2.5 percent defective
4.4.1	Tests	S-2	6.5 percent defective

4.3.1 *Examination of preparation for delivery.* Packed, marked, and closed cases of paper, carbonless transfer obtained in accordance with 4.3 shall be examined for compliance with the applicable requirements of section 5. Each unit of the sample size shall be examined for freedom from the applicable defects listed in table II.

4.3.2 *Examination of paper.* The sample unit shall be one sheet. Not fewer than 5 sheets nor more than 10 sheets shall be taken from each of the containers examined in accordance with 4.3.1. The paper shall be examined for freedom from the defects and imperfections listed in table II.

TABLE II.

Examine	Defects
Packing	Not as specified.
	Number of sheets per container not as specified. (5.1)
	Interlined material (polyethylene film) omitted, damaged, or not as specified. (5.1)
	Container material not as specified.
	Any crushed or mutilated containers which may affect serviceability.
	Closures not accomplished by specified or required methods or materials.
	Not completely wrapped in polyethylene film when required.
Markings	Illegible, incorrect, incomplete, omitted, or not in accordance with contract requirements.
Paper	Dimensions more than 1/8 inch tolerance specified.
	Not square.
	Dimensions vary more than 1/16 inch from any edge to opposite edge.
	Not clean; any discoloration or mark affecting appearance.
	Any hole, tear, breaks, or wrinkles.
	Not trimmed clean; ragged or uneven edges.
	Dirt spots, slime spots, color spots, scabs, lumps, lint, slivers, shives, or crushed.

4.4 Test procedures.

4.4.1 *Specimens.* The sample unit for test shall be 5 sheets taken in consecutive order. Not more than one sample unit shall be taken from each container examined under 4.3.1. If the Government does not request tests of each sample unit, the five sheet sample units may be composited further to one test unit.

4.4.2 The samples shall be conditioned and tested in accordance with the following TAPPI methods, for the applicable characteristics in table III.

Test	Method
Fiber analysis of paper and paperboard	T 401 m
Atmospheric conditions	T 402 m
Grain	T 409 m
Basis weight	T 410 m
Thickness	T 411 m

5. PREPARATION FOR DELIVERY

(For civil agency procurement, the definitions and application of the levels of packing shall be in accordance with Fed. Std. No. 102.)

5.1 Packing. Packing shall be level A, B, or C as specified (see 6.1).

5.1.1 *Level A.* One thousand sheets of paper, carbonless transfer, shall be packed flat in a polyethylene film interlined fiberboard box. Alternatively 1,000 sheets may

TABLE III. *Instructions for testing end item*

Characteristics	Requirements	Basic spec. rqmt.	Test method	Rqmt. appl. to lot average	No. dets. per sample unit	Results reported to nearest—
Stock	100 percent chemical woodpulp	3.1.1	T 401 m	X	5	5 percent
Basis weight 17 x 22-500	17 lbs.	3.1.2	T 410 m	X	5	0.1 pound
Thickness:		3.1.3	T 411 m	X	5	0.0001 in.
Minimum	0.0032					
Maximum	0.0042					
Grain	Short direction	3.1.4	T 409 m	X	5	—

be wrapped in polyethylene film and packed in a fiberboard box. The box shall conform to PPP-B-636, V3c. The box shall be closed, waterproof sealed with tape, and reinforced with bands of filament tape in accordance with the appendix to the box specification.

5.1.2 *Level B.* One thousand sheets of paper, carbonless transfer, shall be packed as specified in 5.1.1, except the box shall be type CF, class domestic, style optional, and waterproof sealing with tape and reinforcing with filament tape shall not be required. Closure shall be in accordance wth the appendix to the box specification.

5.1.3 *Level C.* The paper, carbonless transfer, shall be packed to insure carrier acceptance and safe delivery to destination in containers complying with the rules and regulations applicable to the mode of transportation.

5.2 Marking.

5.2.1 *Civil agencies.* In addition to markings required by the contract or order, the shipping containers shall be marked in accordance with Fed. Std. No. 123.

5.2.2 *Military activities.* In addition to markings required by the contract or order, the shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Ordering data. Purchasers should exercise any desired options offered herein and procurement documents should specify the following:

(*a*) Title, number, and date of this specification.

(*b*) The levels of packing and marking required (5.1, and 5.2).

6.2 Transportation description. Transportation description and minimum weight applicable to this commodity are:

Rail:

Paper, printing, other than newsprint or carbonized print.
Carload minimum weight 36,000 pounds.

Motor:

Paper, printing, other than newsprint or carbonized print.
Truckload minimum weght 36,000 pounds, subject to Rule 115, National Motor Freight Classification.

Copies of this specification may be purchased for 5 cents each.
