MILITARY SPECIFICATION SHEET

PLATES, IDENTIFICATION, EQUIPMENT

This specification is approved for use by the Electronics Command, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

The complete requirements for equipment, identification plates (nameplates) described herein shall consist of this document and the latest issue of MIL-P-15024.

REQUIREMENTS:

1. Plate Type. Unless otherwise specified in the equipment specification or herein, the plates selected by the contractor shall be type A, B, F, G, or H according to the application, and color style III, IV or V according to the color of the item to which the plate is fixed.

2. Plate Size. Unless otherwise specified in the equipment specification or herein, the plates may be any size which is compatible with the size of the equipment to which the plate will be attached.

3. The nameplate for each Military nomenclatured item shall contain the information listed below as shown in figure 1.

a. The following information is mandatory on the nameplate for each item:

(1) Assigned nomenclature (name and type designation); more than one line may be used.

Beneficial comments (recommendations, additions, deletions and any pertinent data which may be of use in improving this document should be addressed to: Commander, US Army Electronics Command, ATTN: DRSEL-RD-TS-S, Fort Monmouth, New Jersey 07703, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

Check the source to verify that this is the current version before use.

(2) Serial number with assigned suffix letter, when serialization is required by the equipment specification, drawings, or contract (see contract for explanation of suffix letter).

(3) Contract number (procurement instrument identification number).

(4) Government ownership designation (US) on last line.

b. As space permits, the following shall also be marked on the nameplate in the priority listed:

(5) National/NATO stock number (NSN).

(6) Special characteristics, if applicable.

(7) Manufacturer's code.

(8) Identifying number, e.g. drawing number.

(9) Design activity.

(10) Operating and storage temperature limits.

c. When a warranty is required by the contract, the warranty period shall be marked on the bottom section of the nameplate, as shown in figure 1, or on a separate plate, as follows: "WARRANTY EXPIRES: (insert date) FOR WARRANTY CLAIM USE DA FORM 2407."

4. The nameplate for commercial equipment that does not have Military nomenclature shall contain the information listed below (see example in figure 2).

a. The following information is mandatory on the nameplate for each item:

(1) National/NATO stock number (NSN).

(2) Manufacturer's nomenclature and identifying number.

(3) Serial number with assigned suffix letter, when required by the contract.

(4) Contract number (procurement instrument identification number).

(5) Government ownership designation (US).

b. As space permits, the following shall also be marked on the nameplate in the priority shown:

Check the source to verify that this is the current version before use.

(6) Special characteristics, if applicable.

(7) Manufacturer's code.

5. When the manufacturer's nomenclature, including type or part number (identifying number), is permanently marked on the equipment, as a normal practice by the manufacturer, the nameplate shall contain as a minimum the following information (see example in figure 3):

a. National/NATO stock number (NSN).

b. Serial number with assigned suffix letter, when required by the contract.

b. Serial number with assigned suffix letter, when required by the contract.

c. Contract number (procurement instrument identification number).

d. Government ownership designation (US).

6. When a special equipment, miscellaneous identification plate is required by the equipment specification, the plate shall be as follows and as shown in figure 4:

a. Unless otherwise specified in the equipment specification, the type of plate shall be type A or type H aluminum plates having the maximum thickness of type A and plates shall have metal fasteners at the corners. When specified in the equipment specification, the type of plate shall be type G, adhesive-backed metal foil.

b. The plate size shall be size number 12 (5- by 3-inch) in lieu of the former 4 1/2- by 3-inch size required (Ref. MS63045).

7. Revision letters are not used to denote changes due to the extensiveness of the changes.

Review activities:
Army - MI, AR, ME

NSA - NS

Preparing Activity:
Army - EL
