# INTERIM COMMERCIAL ITEM DESCRIPTION

## POLYETHYLENE GLYCOL AND ELECTROLYTES FOR ORAL SOLUTION

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

Salient characteristics:

Shall be a powder consisting of one of the following formulas which, when reconstituted as directed in the labeling produces an isosmotic (with respect to colon contents) solution for oral administration:

For Type I, the powder shall consist of the following formula:

| | |
|---|---|
| Polyethylene glycol 3350 ..... | 236 to 240 grams |
| Potassium chloride ..... | 2.9 to 3.0 grams |
| Sodium bicarbonate ..... | 6.7 to 6.75 grams |
| Sodium chloride ..... | 5.8 to 5.9 grams |
| Sodium sulfate ..... | 21.7 to 22.75 grams |

For Type II, the powder shall consist of the following formula:

| | |
|---|---|
| Polyethylene glycol 3350 ..... | 240 grams |
| Potassium chloride ..... | 2.98 grams |
| Sodium bicarbonate ..... | 6.72 grams |
| Sodium chloride ..... | 5.84 grams |
| Sodium sulfate ..... | 22.72 grams |

Shall contain the required amounts of the ingredients in the formula within the applicable assay limits as determined from the batch formulation sheet kept on file by the manufacturer.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The reconstituted solution shall have a pH between 5.0 and 9.0 and osmolality between 260 and 300 mosm/kg, when tested by a suitable, accurate and reproducible methods.

Materials used in the manufacture of the powder shall be of a pharmaceutical grade.

Workmanship. The powder shall be free from defects which detract from its appearance or impair its serviceability.

Unit.

For Type I, Container (CO). The container, (either a dispensing bottle or one or more packets with a dispensing bottle), containing 274 to 279 grams of powder, as specified, constitutes one unit. The dispensing bottle with a leak-proof cap shall have a capacity of not less than 4 liters of water, an indicator that denotes the final solution fill level, a suitable carrying handle and sufficient neck opening to allow for easy addition of the diluent and any powders.

For Type II, Bottle (BT). One bottle containing 278.26 g powder for reconstitution to 4 liters, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

| NSN | ITEM IDENTIFICATION | TYPE |
|---|---|---|
| 6505-01-193-7331 | POLYETHYLENE GLYCOL and ELECTROLYTES for ORAL SOLUTION, *gram | I |
| 6505-01-261-4850 | POLYETHYLENE GLYCOL and ELECTROLYTES for ORAL SOLUTION, 278.26 gram | II |

* 274 to 279 grams depending on the quantity supplied.

Ordering data. Expiration dating required, intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.

**INSTRUCTIONS:** In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

*NOTE:* This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
