COMMERCIAL ITEM DESCRIPTION

EGGNOG, LIQUID, CANNED

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification C-M-1730.

Salient characteristics.

The product shall conform to the types in the following list which shall be specified as required in the contract or purchase order. The Department of Defense packing and packaging requirements are contained in the section entitled "For Department of Defense procurements" found on page 2.

A. Types.

Type I - Eggnog with spices
Type II - Eggnog without spices

B. Finished product description.

Types I and II.

Eggnog shall comply with 21 CFR 131.170. It shall have a sweet, pleasing, typical flavor ranging from an egg custard-like flavor without spices to a moderately strong flavor with rum and nutmeg spice background flavor. It may have the following flavors to a slight degree: cooked, feed, or flat, but shall be free from all other objectionable flavors. If spices are present, they shall be uniformly distributed upon gentle agitation. The eggnog shall be homogenized. The body shall be smooth with a creamy consistency and shall show no evidence of serum separation, ropiness, slimy mouth feel, or thick consistency. The color shall be uniformly off-white to yellow, and shall be free from mottling. The eggnog is to be processed in accordance with the Food and Drug Administration's low-acid regulations found in 21 CFR 113.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this Commercial Item Description (CID); conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

All egg products shall have been processed according to 7 CFR 59, Regulations Governing the Inspection of Eggs and Egg Products. The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

Prior to submission of offers, plants shall be approved by the Dairy Grading Section, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture (USDA). When required in the solicitation, contract, or purchase order, the Dairy Grading Section will determine the quality assurance of the eggnog according to their procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The eggnog shall be preserved, packaged, packed, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the contract or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer:

A. Packaging. Thirty-two fluid ounces of product shall be filled in a tin plated metal can and hermetically sealed. Cans shall be round, open-top style, with soldered or welded side seams and compound-lined, double seamed ends. Alternatively, can ends may be fabricated from ECCS plate, enameled both inside and out. The entire inside area shall be enameled. The can shall be coated outside with a coating conforming to Type I, or, when specified, Type III of TT-C-495.

B. Packing. Twelve cans shall be packed in a fiberboard box constructed, closed, and reinforced in accordance with PPP-B-636, Grade V3s or V4c, Style RSC. Reinforcement shall be limited to nonmetallic strapping or pressure-sensitive, adhesive, filament-reinforced tape.

C. Unit loads. Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078.

D. Marking. Marking of unit pack, shipping container, and unit load shall be in accordance with MIL-STD-129.

Notes.

Purchasers shall specify:

- Labeling requirements, if different from good commercial practice.
- Type of eggnog.
- If USDA is to perform an acceptance inspection.
- If USDA is to perform a condition of container inspection.
- When can coating conforming to Type III of TT-C-495 is required for export packaging.
