COMMERCIAL ITEM DESCRIPTION

TOOTHPICK (WOOD)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification LLL-T-1332.

Salient characteristics:

Toothpicks shall be fabricated from white birch wood conforming to the applicable requirements stipulated by the Food and Drug Administration, Code of Federal Regulations, Title 21. Toothpicks shall be made with the grain of the wood running in the same direction as the long axis, be uniform in color, have no objectionable odor or taste, and conform to the following types.

Type I - Flat

Length = 2-1/4 ± 1/8 inch
Width = Wide end -0.082 inch ± .012 inch; Narrow end - 0.040 inch ± 0.005 inch
Thickness = Center, within 3/4 inch of ends - 0.045 inch ± 0.010 inch; Ends - 0.018 inch ± 0.008 inch
Finish = Smooth, natural, flat veneer

Type II - Round

Length = 2-5/8 ± 1/8 inch
Diameter = Center - 0.088 inch ± 0.012 inch; Ends - 0.027 inch, maximum
Finish = Smooth, natural, straight grain dowel or veneer

The issue of the CFR in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Workmanship. Toothpicks shall be clear, free from surface checks, splinters or other defects which may affect serviceability or appearance.

Test. Immerse toothpicks in distilled water at $180^{\circ} \pm 5^{\circ}$ F for 15 minutes, then compare the sample water with that of freshly distilled water at same temperature and container for the same length of time. There shall be no objectionable taste or order.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.
