COMMERCIAL ITEM DESCRIPTION

SHEATH, PEN AND PENCIL, POCKET (PLASTIC)

The General Services Administration has authorized the use of this commercial item description in lieu of Interim Federal Specification GG-S-00310.

This commercial item description covers plastic pocket sheaths intended for use as a holder and protector when carrying pens, pencils, scales and similar equipment in shirt pockets.

Salient characteristics:

The pocket sheath shall be comprised of no more than three pieces of flexible plastic sheet, with one piece each composing the front, back, and downward projecting front flap.

The sheath shall be so designed as to fit the breast pocket of the user's shirt and be non-injurous to personnel under normal usage. It shall be flame resistant or slow-burning.

All seams shall be formed by high frequency welding to insure strength and allow flexibility.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices, and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The sheaths shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
