COMMERCIAL ITEM DESCRIPTION

PITCHER, VACUUM, ONE QUART

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification RR-P-375.

This commercial item description covers 1 quart vacuum pitchers used in mess halls, hospitals, and similar locations.

Salient characteristics:

The vacuum pitcher shall consist of a plastic outer shell, an inner shell consisting of a vacuum type replaceable glass filler, a lid, a removable stopper or float closure, a pouring lip flange, handle, and an optional plastic filler shield.

Workmanship. The finished pitcher must be clean, complete with no mold marks, rough or sharp edges, scratches or deformities. There shall be no defects which might affect serviceability, durability or appearance.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.
