COMMERCIAL ITEM DESCRIPTION

DRAWING LEADS

The General Services Administration has authorized the use of this commercial item description.

This description covers leads for use in lead holders by artists, draftsmen, and designers.

Salient characteristics.

Leads shall:

Be graphite for drawings and sketching and for working directly on drawing or tracing paper and pencil tracing cloth, or plastic-based for use on drafting film.

Be a minimum of 5 inches long and 0.070 to 0.080 inches in diameter.

Be the degree of hardness specified. Hardness degree shall be marked on lead.

Be continuously smooth marking, provide clearly visible lines, not crumble or dust, and be easily erasable with suitable rubber, art gum or plastic erasers.

Workmanship. Leads shall be clean and free from defects which affect serviceability, durability or appearance.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

Note: Purchasers shall specify type of lead and lead hardness degree desired.

The term "lead" is used to denote the marking medium.
