COMMERCIAL ITEM DESCRIPTION

SODIUM CHLORIDE IRRIGATION, USP

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Military Specification MIL-S-37486A which is cancelled.

Salient characteristics.

Shall be Sodium Chloride Irrigation, USP.

Shall be in accordance with the requirements of the USP.

All ingredients shall be of a pharmaceutical grade.

Shall contain Sodium Chloride 0.9 percent (9 mg per ml) within the applicable assay limits for the solution.

Workmanship. The solution shall be free from defects which detract from its appearance or impair its serviceability.

Unit.

For Size 1, shall be supplied 1000 ml in a commercially available, wide-mouth, pour-type, semi-rigid plastic container with a screwcap and with a hanging device. The container neck shall be not less than 38 mm in diameter, and the closure shall not be adaptable to the application of the Military intravenous sets. One package containing 12 containers, as specified, constitutes one unit.

For Size 2, shall be supplied 2000 ml in a commercially available, wide-mouth, pour-type, semi-rigid plastic container with a screwcap and with a hanging device. The container neck shall be not less than 38 mm in diameter, and the closure shall not be adaptable to the application of the Military intravenous sets. One package containing 8 containers, as specified, constitutes one unit.

AMSC/NA FSC 6505

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

For Size 3, shall be supplied 3000 ml in a commercially available flexible plastic bag having two permanently attached outlet ports. One outlet port shall have a rubber latex sleeve or natural rubber stopper attached and shall be suitable for an injection site. The other outlet port shall be force-fitted with a suitable sterility protector and shall accept and retain piercing device of the irrigation administration sets. The port shall be of such design as to hold and make a proper leak proof fit with the standard irrigation administration set (NSN 6515-00-198-5446) and accept urologic and arthoscopic irrigation administration sets with a connector having a 3/4 inch (0.75 mm) long piercing connector with an external diameter of 0.213 inch. The opposite end of the plastic bag shall have a heavy plastic hanger strap which is an integral part of the body of the container and shall have a slot in the center of the hanger strap. The integral hanger shall be of sufficient strength to bear the weight of the filled bag with the attached irrigation administration set. The plastic bag shall be supplied in an overpouch which shall serve as a water vapor barrier. One package containing 4 bags, as specified, constitutes one unit.

Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug, and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.
