Samples For Walter Reed Army Institute of Research.

Samples of the final, filled immediate containers shall be submitted as follows:

The contractor, when inspection is at source, or at destination, shall send the following by the fastest route directly to:

Dept of Biologics Research, DCD & I WRAIR
Bldg 501, Forest Glen Station
ATTN: Bio Assay Control System
Silver Spring, MD 20910

1. Six (6) vials (including circulars) from each lot or batch, accompanied by a DD form 1222 bearing the following information:

a. National Stock Number
b. Item Identification
c. Contract Number
d. Contractor's name and address
e. Lot or control number
f. Quantity of material represented by the sample

2. One (1) copy of the protocol which the manufacturer has submitted to the Center for Biologics Evaluation and Research (CBER) stating the essential manufacturing processes and results of tests for each lot or batch.

3. One (1) copy of Center for Biologics Evaluation and Research (CBER) release for each lot or batch.

Shipment of material shall not be withheld for a report from Walter Reed Army Institute of Research.

When inspection is made at source or destination, the contractor shall submit one (1) copy of the Center for Biologics Evaluation and Research (CBER) release and certificate of sterility for each lot or batch, and two (2) copies of document, submitted with the samples, directly to the Quality Assurance Division, Directorate of Medical Materiel, Defense Personnel Support Center, ATTN: DPSC-MQ, 2800 S. 20th Street, Philadelphia, PA 19101. In addition, when inspection is at destination, the contractor shall submit one (1) copy of the Center for Biologics Evaluation and Research (CBER) release with the shipment to the cosignee.

Workmanship. The vaccine shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Vial (VI). One vial containing the number of doses, as specified, in the solicitation, constitutes one unit.

Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug, and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations.

Intermediate package and exterior (shipping) container quantities shall be as specified in the solicitation.

Unitized loads shall be used whenever total quantity for shipment to one destination exceeds 250 lbs or 20 cubic feet. Loads shall be unitized as specified in MIL-STD-147 on type IV or type V 4-way entry pallets. As an alternate, commercial palletization may be supplied.

Labeling and marking.

Each unit (vial) label shall be marked in accordance with commercial practice. Marking shall include the National Stock Number (NSN) and expiration date.

Intermediate package (if supplied), exterior (shipping) container, and palletized unit loads shall be marked as specified in MIL-STD-129. Marking shall include the lot (control) number and expiration date and the legends: "Store between 2° - 8°C (35° - 46°F)" and "Do not permit to freeze" or similar commercial legends. As an alternate, placement of markings in accordance with Center for Biologics Evaluation and Research (CBER) regulations is acceptable provided all markings required by MIL-STD-129 are applied.

NOTE: Material shall be shipped under constant refrigeration 2° - 8°C (35° - 46°F).

NOTE: The Hypodermic Injection Apparatus referenced on page 1 are listed in the Federal Supply Catalog as follows:

	NSN	ITEM IDENTIFICATION
(a)	6515-00-656-1021	HYPODERMIC INJECTION APPARATUS, Jet, Automatic, 115 volt, 50-60 Hz, AC
(b)	6515-00-910-0097	HYPODERMIC INJECTION APPARATUS, Jet, Foot Operated

(c) ATTN: NSN with strains and potencies for the Influenza Virus Vaccine(s) will appear in the solicitation.
