COMMERCIAL ITEM DESCRIPTION

BOX, INSECT, SPECIMEN

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Military Specification MIL-B-37409 which is cancelled.

This Commercial Item Description covers one type of insect specimen box of the Schmitt type.

Salient characteristics:

Insect box shall be Schmitt type, 2-1/2 ± 1/8 by 9 ± 1/2 by 13 ± 1/2 inches (in.), with hinged cover and shall be shoulder type with inset beveled conforming to Figure 1. Sides shall be solid basswood, 3/8 inch ± 1/32 in. thick; top and bottom shall be 3-ply basswood, 3/16 inch ± 1/32 in thick. Box shall have a pestproof lining and shall be properly mitered and beveled to provide a fit sufficiently tight to prevent entrance of pest when the box is closed. The inside at the bottom shall be completely lined with cork, securely anchored to the bottom, to provide a resilient pinning base for specimens. The entire interior, including the cover, but excluding the sides of the cover, shall be lined with paper. Paper shall be placed so that the glazed side is exposed. The bottom surface covered with cork and the paper shall provide a resilient surface suitable for mounting insect specimen. Box shall be assembled with neatly mitered and splined joints. Hinges and hooks shall be brass of suitable size and weight, neatly affixed to provide secure closure.

The solid wood shall be of the highest-quality basswood, well seasoned, thoroughly kiln-dried, free of knots, decay, and other defects which may affect its strength or durability, and shall present a smooth surface for painting.

AMSC N/A FSC 6640

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The plywood shall be 3-ply basswood, well-seasoned and thoroughly kiln-dried. Veneers shall be made of one or more piece of firm, smoothly cut veneer, and when more than one piece, it shall be well joined and reasonably matched for grain and color at the joints. The veneer shall be free of knots, splits, pitch pockets, and other open defects. Streaks, discolorations, sapwood, shims, and neatly made patches shall be admitted. Veneers shall present a smooth surface suitable for painting.

Paper shall be heavy and white. One side shall be flint-glazed and shall have a lacquer-like finish. The cork shall be high-density, heavy-gage entomological cork containing not more than 5 percent moisture. The exterior of the box shall be primed and finished in olive drab enamel. Hinges and exposed hardware shall be treated to prevent corrosion.

Workmanship. The insect box shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One insect box, as specified, constitutes one unit.

QUALITY ASSURANCE PROVISIONS.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and an inspection level of S-2. The unit of product for examination purposes shall be one insect box.

Test. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug, and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction , the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug, and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.)

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE. This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
