COMMERCIAL ITEM DESCRIPTION

SODIUM BICARBONATE INJECTION, USP

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Military Specification MIL-S-37795 which is cancelled.

Salient characteristics.

Shall be Sodium Bicarbonate Injection, USP.

Shall be in accordance with the requirements of the USP.

All ingredients shall be of a pharmaceutical grade.

Strength:

1. 42 mg/ml equivalent to 4.2%
2. 75 mg/ml equivalent to 7.5%
3. 84 mg/ml equivalent to 8.4%

The solution shall assay to contain the labeled amount of Sodium Bicarbonate within the applicable assay limits for the solution.

Workmanship. The solution shall be free from defects which detract from its appearance or impair its serviceability.

AMSC/NA

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Unit.

For Size I. Shall be supplied 50 ml in a commercially available ampul. One package containing 25 ampules, as specified, constitutes one unit.

For Size II. Shall be supplied 10 ml in a commercially available clear, colorless, cylindrical, flat-bottom, graduated, threaded rubber stoppered vial with plastic-plug cap. Each vial shall be packaged together with a translucent plastic vial injector containing a plastic cylinder, threaded at one end and attached to the base of the injector barrel at the other, and a 21/22 gage x 1-1/2 inch needle (exposed) extending the length of and projecting from the barrel. The injector shall be sealed with a plastic needle guard and a plastic snap cap. The fluid pathway of all components shall be sterile. One package containing 10 syringe-needle units, as specified, constitutes one unit.

For Size III. Shall be supplied 50 ml in a commercially available clear, colorless, cylindrical, flat-bottom, graduated, threaded rubber stoppered glass vial with plastic-plug cap. Each vial shall be packaged together with a translucent plastic vial injector containing a plastic cylinder, threaded at one end and attached to the base of the injector barrel at the other, and a 18 gage x 1-1/2 inch (3.8 cm) needle (exposed) extending the length of and projecting from the barrel. The injector shall be sealed with a plastic needle guard and a plastic snap cap. The fluid pathway of all components shall be sterile. One package containing 10 syringe-needle units, as specified, constitutes one unit.

All syringe-needle units shall be suitable for use with 6545-01-079-4254 Resuscitator Kit Cardiopulmonary.

Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug, and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to the degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. Expiration dating required, intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

NSN	ITEM IDENTIFICATION	STGH.	SIZE
