FOREWORD

1. This military standard is approved for use by all Departments and Agencies of the Department of Defense.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FSSD, 2800 South 20th Street, Philadelphia, PA 19101-8419, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

3. This Standard establishes a labeling system for selected women's uniform garments which is based upon body measurements, such as bust circumference and hip circumference, instead of, or in addition to, traditional but arbitrarily numbered size codes (e.g. Size 10, 12, or 14).

1. SCOPE

1.1 Purpose. The purposes of this Standard are to:

a. Improve the fit of garments selected by women on the basis of labeled sizing information by providing actual body measurement information on the label.

b. Achieve DOD standardization with regard to size designations of women's uniform clothing.

1.2 Application. This Standard describes the information to be used in the size labels of uniform coats, skirts, and slacks for women in the Department of Defense (DOD). The information standardizes only the size designation and the body measurements associated with each size. Differences between the services in the body size of their populations, uniform styles, and concept of fit would be dealt with by other factors such as design, ease, and tariffs (the number of each size to buy).

2. APPLICABLE DOCUMENTS

2.1 Source documents. Data obtained in the following studies and standards were used in establishing size designations specified in this standard:

2.1.1 Government documents.

Mellian, Sirvart A., Cay A. Ervin, and Kathleen M. Robinette. 1990. Sizing Evaluation of Navy Women's Uniforms. Technical Report NCTRF No. 182, and AL-TR-1991-0116, Navy Clothing and Textile Research Facility, Natick, MA, and Harry G. Armstrong Aerospace Medical Research Laboratory, Wright-Patterson Air Force base, OH.

Robinette, Kathleen M., Sirvart Mellian, and Cay A. Ervin. 1990. Development of Sizing Systems for Navy Women's Uniforms. Technical Report NCTRF No. 183, and AL-TR-1991-0117, Navy Clothing and Textile Research Facility, Natick, MA, and Harry G. Armstrong Aerospace Medical Research Laboratory, Wright-Patterson Air Force Base, OH.

Check the source to verify that this is the current version before use.

2.1.2 Non-government documents.

International Standardization Organization (ISO). Standard ISO 3637-1977e, Size Designation of Clothes-Woman's and Girls Outerwear Garments.

American Society for Testing and Materials (ASTM). Proposed Standard ASTM D, Standard Tables of Body Measurements for Women (Misses Sizes).

2.2 Related documents. Data from other studies were consulted to verify the suitability of the dimensions. These studies are documented in the following reports:

Clauser, Charles E., John T. McConville, E. Churchill, Lloyd L. Laubach, and Joan A. Reardon, 1972. Anthropometry of Air Force Women, AMRL-TR-70-5, Aerospace Medical Research Laboratory, Wright-Patterson Air Force Base, OH.

Gordon, Claire C., Bruce Bradtmiller, Thomas Churchill, Charles E. Clauser, John T. McConville, Ilse Tebbetts, and Robert Walker, 1989. 1988 Anthropometric Survey of U.S. Army Personnel: Methods and Summary Statistics. Technical Report NATICK/TR-89/044. United States Army Natick Research, Development and Engineering Center, Natick, MA.

3. DEFINITIONS

3.1 Definitions. The terms in this standard are defined as follows.

a. Bust circumference. The horizontal circumference of the bust measured with a tape passing over the bra points.

b. Height. The vertical distance from the floor to the top of the head, without shoes.

c. Hip circumference. The maximum circumference of the hips.

d. "J". The letter J following a numerical size, as in 8J, stands for Junior, and designates a size proportioned to fit a narrow-hipped female.

e. "W". The letter W following a numerical size, as in 14W, stands for Women's, and designates a size proportioned to fit a larger-hipped female.

f. Waist circumference. The horizontal circumference of the waist at the "natural" waist level.

Check the source to verify that this is the current version before use.

4. GENERAL REQUIREMENTS

4.1 Dimensional designations. The dimensions used to designate sizes in each garment shall be as follows:

a. Women's Coat: Bust Circumference, Hip Circumference, and Height.

b. Women's Slacks and Skirts: Hip Circumference, Waist Circumference, and Height.

These dimensions, to be numerically designated in inches, represent body measurements, not garment measurements.

4.1.1 Numerical size designations for circumferences. Numerical size designations for circumferences will be in single figures (e.g. Bust Circumference 34 inches). Height will be designated as a range (e.g. 63.5" to 67 inches).

5. DETAILED REQUIREMENTS

5.1 Labeling.

5.1.1 Size designation. The size designation of each garment shall be indicated clearly, conspicuously, and in plainly legible form on a label, or on a sewing label, or both. Pictograms, if used, shall be large enough to ensure immediate comprehension and numerals shall, in all cases, be readily discernible.

5.1.2 Label or sewing label. The label or sewing label shall be securely attached to the garment and so positioned as to be easily readable.

Check the source to verify that this is the current version before use.

5.1.3 Additional information. Information additional to the size designation may be separately indicated on the label, or on the sewing label, or on both, provided that it does not in any case reduce the prominence and conspicuousness of the size designation. Such additional information may include a size code which may be useful in helping users accustomed to such designations select the size of best fit during a period of transition to a labeling system based exclusively on body dimensions.

5.1.4 Examples of labels. Examples of labels appear in figures 1 and 2.

5.2 Sizes. The sizes used in the labels shall be selected from those in tables I through III. All the sizes which appear in these tables need not be used. Size information should be tailored to satisfy individual needs. However, for a given size, the numbers taken from table I shall be selected from a single row. Size designations are for clarification only.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory).

6.1 Intended use. This Standard is intended to provide a labeling system for selected uniform garments as an alternate or in addition to traditional but arbitrarily numbered size codes.

6.2 Subject term (key word) listing.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8 In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.

I RECOMMEND A CHANGE:	1. DOCUMENT NUMBER	2. DOCUMENT DATE (YYMMDD)
	MIL-STD-984	31 January 1992

3. DOCUMENT TITLE
