MIL-S-83961
AMENDMENT 1

7 June 1978

MILITARY SPECIFICATION

SPRAYER, INSECTICIDE,
ELECTRIC-MOTOR-DRIVEN,
FRAME MOUNTED

This amendment forms a part of Military Specification MIL-S-83961, dated 15 July 1971.

Page 2, Para 3.3 Delete entire para and substitute the following:

"3.3 Materials. Recycled and recovered raw materials should be used to the maximum extent possible in lieu of virgin raw materials in the manufacturing of sprayers as long as these materials do not jeopardize the intended use and fully comply with all contract requirements. Recycled and recovered raw materials (such as glass, metals, paper, etc.) are produced directly from fresh substances, like virgin metal is made from ore. Materials used shall be free from defects which would adversely affect the performance or maintainability of individual components or the overall assembly. Materials not specified herein shall be of the same quality used for the intended purpose in commercial practice. None of the above shall be interpreted to mean that the use of used or rebuilt products will be allowed."
