DATA ITEM DESCRIPTION
Title: VESSEL DOCKING AND UNDOCKING PLAN

Number: DI-MGMT-82094
AMSC Number: N9755
DTIC Applicable: No
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20161208
Limitation: N/A
GIDEP Applicable: No
Project Number: MGMT-2017-002

Use/Relationship: The plan will document a detailed plan to safely dock and undock the vessel(s). It is used by the Government to review, comment, and approve docking and undocking plans prior to each docking and undocking evolution.

This DID contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

1. Format. The Plan shall be in contractor's format.

2. Content. The Plan shall include the following Docking Procedures:
a. Operating Practices
b. Safety and Security Plans
c. Special precautions or actions required by the characteristics of the dock, marine railway, or other docking methods
d. Pumping/flooding schedule
e. Specific list, trim, and stability requirements

3. The Plan shall contain:
a. Set and align docking blocks
b. A scaled drawing including block size, block spacing, and location of vessel with respect to the blocks at landing
c. Docking clearances utilizing references for guidance
d. The use of haul, fixed, or fitted blocks
e. The number, distance from centerline, and square footage of the side blocks per side sufficient to resist overturning moments

4. The Plan shall show that at least 90 percent of blocks land on longitudinal strength members or main transverse bulkheads.

End of DI-MGMT-82094
