DATA ITEM DESCRIPTION
Title: TEMPORARY ACCESS CUT DRAWING/SKETCH

Number: DI-PSSS-82079
AMSC Number: N9703
DTIC Applicable: No
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20161004
Limitation: N/A
GIDEP Applicable: No
Project Number: PSSS-2016-020

Use/Relationship: This DID will identify each proposed access cut to the ship structure and engine enclosure and a list of each proposed bolted/riveted access removal. The drawing/sketch shall not contain authorized access cuts on NAVSEA-approved drawings.

This DID contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

References. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

Format. The Drawing/Sketch shall be in the contractor's format.

Content. The Drawing/Sketch shall include the following information:

A plan and elevation view specifying the location of the access by deck, frame, and distance from the center line or deck edge and showing location of adjacent penetrations, bulkheads, framing, welds, and riveted joints within 12 inches of the proposed cut.

Location and number of previous cuts visible in each plate and the cutback of existing welds.

Temporary structural reinforcement required to prevent distortion of ship structure.

Thickness and type of material of plating and structural members to be cut. Include source or document/drawing number which identifies material requirements.

A description of the temporary access closure and enclosures.

A copy of the weld approved weld procedure number with the proposed access sketch.

List of bolted/riveted access covers shall include location, designation, and classification as identified on ship's damage control book.

All drawing titles and numbers (including applicable sub-tier), and technical documentation that will used to accomplish the requirements of MIL-STD-1689.

End of DI-PSSS-82079
