DATA ITEM DESCRIPTION

Title: UNITED STATES MARINE CORPS RELIABILITY-CENTERED MAINTENANCE (RCM) ANALYSIS REPORT

Number: DI-PSSS-82114A
AMSC Number: N10426
DTIC Applicable: No
Preparing Activity: MC
Applicable Forms: None

Approval Date: 20230922
Limitation: N/A
GIDEP Applicable: No
Project Number: PSSS-2023-014

Use/relationship: The Reliability Centered Maintenance (RCM) Analysis Report documents, in complete detail, the information supporting and resulting from the RCM analysis of a system or asset conducted with the support of an RCM Review Group.

a. This DID contains the format, content, and intended use information for the data deliverable resulting from the work task described in the solicitation and is related to DI-PSSS-82115, RCM Analysis Information Phase Report and DI PSSS-82116, RCM Analysis Decision Phase Report.

b. This DID supersedes DI-PSSS-82114.

Requirements:

1. Reference Documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format.

a. The report and all attachments shall be in files compatible with Microsoft Office.

b. The report shall be formatted to be printed on standard letter size paper (8½" x 11").

c. All enclosures shall be fully identified, referenced in the text, and, when necessary, folded to conform to the size paper used in the report.

d. Security classification and distribution markings shall conform to the requirements of the contract, purchase description, and security requirements, as applicable.

3. Content.

3.1. Title page. Identifies the report, project name, system name, contract number, task number, and analysis date.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:59Z
Check the source to verify that this is the current version before use.

3.2. Table of contents. Identifies the topics covered in each part of the report and references the page on which each topic begins.

3.3. Executive summary. A brief statement of the failure management strategy developed with the support of an RCM review group, including any high-level observations by the group.

3.4. Introduction. Addresses the objectives and details of the analytical effort.

3.5. Section I. Includes the following:

3.5.1. Operating context of the asset or system. Addresses the requirements of the SAE JA1011 standard as amplified by the SAE JA1012 guide. (Copies of SAE JA1011 and SAE JA1012 are available online at www.sae.org.)

3.5.2. Review group members. Identifies the RCM facilitator, review group members, and other support personnel involved with the analysis.

3.5.3. References. Identifies the Marine Corps technical publications, and industry or government publications, standards, or regulations consulted by the RCM review group to support the analysis.

3.5.4. Analysis assumptions. Addresses, in detail, any assumptions adopted by the RCM review group to conduct the analysis.

3.6. Section II. Includes the following:

3.6.1. Analysis boundary. Provides a high-level, graphical representation of the inputs to the system or asset during operation; systems, sub-systems, and components under analysis; and outputs from the system or asset as a result of its operation. The analysis boundary may also provide a detailed written justification behind the exclusion of any system, sub-system, or component within the analysis boundary from analysis.

3.6.2. Asset or system overview. Provides a brief visual and written representation of the asset or system under analysis.

3.7. Section III. Includes the following RCM analysis results:

3.7.1. Analysis highlights. Analysis highlights are extracted from the RCM information phase (DIPSSS-82115) and RCM decision phase (DI-PSSS-82116). Note that in some cases, one or more of the following topics may not apply and therefore will not be addressed.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:59Z
Check the source to verify that this is the current version before use.

a. Safety-related issues and recommendations. A detailed description of each safety-related issue identified during the analysis and any recommendation developed by the RCM review group.

b. Notable training-related issues and recommendations. A detailed description of noteworthy training related issues identified during the analysis along with the resulting recommendations developed by the RCM review group.

c. Notable technical manual-related issues and recommendations. A detailed description of noteworthy technical manual-related issues identified during the analysis along with the resulting recommendations developed by the RCM review group.

d. Notable design-related issues and recommendations. A detailed description of noteworthy design related issues identified during the analysis along with the resulting recommendations developed by the RCM review group.

e. Notable process-related issues and recommendations. A detailed description of noteworthy process related issues identified during the analysis along with the resulting recommendations developed by the RCM review group.

3.7.2. Preventive maintenance checks and services (PMCS) requirements.

a. Validation of current tasks. Addresses current preventive maintenance, checks, and service requirements validated by the conduct of the RCM analysis.

b. Modification of current tasks. Provides a detailed justification for any recommendation to modify any aspect of a current PMCS requirement.

c. Additional PMCS tasks. Provides a detailed description and justification for any additional PMCS requirement recommended by the RCM review group.

d. Current tasks recommended for deletion. Provides a detailed justification for any recommendation to delete a current PMCS requirement.

3.7.2. List of safety-related recommendations. Formatted as a table. Provides a complete list of failure modes that may affect safety, in Risk Assessment Code sequence, along with the recommendations developed by the RCM review group.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:59Z
Check the source to verify that this is the current version before use.

3.7.3. These recommendations must be intended to prevent or reduce the probability of the event to a level tolerable to the user or owner.

3.7.4. Complete list of recommendations. Formatted as a table. Provides a complete list of recommendations, in Risk Priority Number sequence, along with the recommendations developed by the RCM review group that are intended to prevent or reduce the risk of failure.

3.8. Section IV – Appendixes. Appendixes shall include the RCM information worksheets and RCM decision worksheets generated during the analysis. Any other information that enhances the value of the Analysis Report may also be included.

End of DI-PSSS-82114A.
