DEPARTMENT OF DEFENSE
WASHINGTON, D. C. 20301

Attachments and Accessories for Riveting Machines

MIL-STD-942

1. This Military Standard is mandatory for use by all Departments and Agencies of the Department of Defense.

2. Recommended corrections, additions, or deletions should be addressed to Defense Industrial Plant Equipment Center, ATTN: DIPEC-TF, Airways Blvd., Memphis, Tennessee 38102.

FOREWORD

This document has been developed as a result of a study into the feasibility of standardization of attachments and accessories for riveting machines (FSC 3448) furnished to support the Military Supply System.

The intent of this standard is to provide a fully coordinated document which will specify attachments and accessories for riveting machines.

1. SCOPE

1.1 General. This standard establishes the guidance in identifying and defining riveting machines by type and function and specifying the attachments and accessories necessary to extend the capability of riveting machines and to provide the most economic equipage for initial issue as well as for reallocation through DSA maintenance programs.

1.2 Application. This standard is applicable to all DSA and Military Activities, active and reserve, and to all distribution points for Military support. It is not intended that this standard be used as a guide where the machines are required to be completely self-supporting.

2. REFERENCE DOCUMENTS

2.1 Catalogs and Manuals.

MILITARY

Defense Supply Agency

C 3441/50-IL	Consolidated Federal Supply Catalog - Identification List for Metalworking Machinery.
DSAM 4215.2	Defense Industrial Plant Equipment Storage/Maintenance Activities Operations Manual.

Air Force

T O 34-1-12	Technical Manual - Accessory Listing for FSC 3220 Woodworking Machinery and FSG 3400 Metalworking Machinery.

Army

SC 3455/70-IL	Department of the Army Supply Catalog - Identification List for FSC Group 34 Metalworking Machinery.

(Copies of the referenced military documents may be obtained through normal distribution channels as prescribed by current instructions for the applicable Military Department or Agency.)

3. DEFINITIONS. For the purpose of this standard, the following definitions shall apply.

3.1 Basic machine. The basic item as described by its nomenclature, composed of all fitted, mated, and permanently attached components necessary to effect its proper operation within specific parameters.

3.2 Attachments and accessories. A supplementary device, not permanently fitted, mated, or attached, used in conjunction with the basic machine, contributing to the effectiveness thereof, and extending the parameters of operations without permanently varying the basic machine.

3.3 Riveting machines. The group of secondary metalworking machines designed to perform heading operations on rivets by upsetting the shank end of the rivet after insertion.

3.3.1 Riveting machine, impact type. A machine designed for setting cold rivets by delivering single or multiple hammer-like blows to rivet sets.

3.3.2 Riveting machine, impact-spinning type. A machine designed for setting cold rivets by combining impact action with spinning to form rivet heads into specific shapes.

3.3.3 Riveting machine, spinning type. A machine designed for setting cold rivets by pressing the metal stock with a rotating and rolling movement to form rivet heads into specific shapes.

3.3.4 Riveting machines, squeeze type. A machine designed for cold setting rivets by compression.

4. GENERAL REQUIREMENTS

4.1 Components. In some instances, previous military requirements as listed in T. O. 34-1-12 have included as attachments and accessories

certain items which, by definition in this standard, are considered components of the basic machine. Since these items are, for the most part, fitted by the manufacturer and form a permanent part of the machine, they shall not be removed from the machine when so equipped nor will they be added to machines not so equipped unless it is determined to be economically feasible and within the design parameters of the basic machine.

4.2 Consumable/expendable tooling. Consumable items which are identified with various end items in Consolidated Federal Supply Catalog C 3441/50-IL are not classified as attachments and accessory items in this standard. These items are generally covered under FSC 3456 "Cutting and Forming Tools for Secondary Metalworking Machines" and FSC 3461 "Accessories for Secondary Metalworking Machines" as listed in Supply Catalog SC 3445/70-IL.

5. DETAIL REQUIREMENTS

5.1 Attachments and accessories. Table I specifies the attachment/accessory items considered standard for riveting machines. These items shall be issued with; maintained; and returned with the end item to storage facilities when determined to be excess by the using activity.

TABLE I

ATTACHMENTS AND ACCESSORIES FOR:

RIVETING MACHINES

Quantity	Name
1 each	Rivet Hopper
1 each	Foot Control
1 set	Rivet Sets
