COMMERCIAL ITEM DESCRIPTION

MARKER, IDENTIFICATION

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers a pressure sensitive numeric legend identification label for x-ray film folders.

Salient characteristics:

The identification marker shall be a numerical, color-coded label, coated one side with pressure-sensitive permanent acrylic adhesive. Each marker shall contain a single numeral, printed twice. The numeral shall be white on the background color specified, except for the numeral "6" which shall be black on a white background. The numerals and background colors shall be as follows:

Numeral	Numeral Color	Background Color
0	White	Orange
1	White	Green
2	White	Yellow
3	White	Gray
4	White	Black
5	White	Blue
6	Black	White
7	White	Brown
8	White	Pink
9	White	Red

Each identification marker roll shall contain one thousand 1-7/8 inch by 1-7/8 inch (4.75 cm by 4.75 cm) markers. The markers shall be easily separated from the roll and provide a permanent attachment to the x-ray folder.

AMSC N/A FSC 7690

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Numerals shall be printed twice, side-by-side, so that the numeral appears on the front and back when folded around the vertical edge of a folder. The numeral shall be printed parallel and adjacent to the left and right margins of the label in order that the numerals are vertical during folder storage.

Mylar coated labels are not acceptable.

Workmanship. The identification marker shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Roll (RO). One roll of 1000 identification markers, of one type only, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling. Sampling for examination shall be conducted in accordance with MIL-STD-105 and table I. The unit of product for sampling purposes shall be one roll of identification markers as specified in this description.

TABLE I. Sampling for examination.

	Inspection level	AQL (defects per hundred units)
For visual examination		
Major defects	II	1.0
Total defects (Major and minor combined)	II	4.0
For dimensional examination	S-1	2.5

Examination. The identification marker roll shall be examined to determine compliance with all requirements contained in this specification.

Classification of defects. Examination shall be conducted in accordance with the classification of defects listed in table II. Examination shall not be restricted to the classified possible defects below.

TABLE II. Categories and Defects.

Categories	Defects
Major	
101	Label does not have correct numeral color or background color.
102	Adhesive does not provide a permanent attachment to the x-ray folder.
103	Numeral not printed twice on each label.
104	Numeral not printed parallel and adjacent to the left and right margins of the label.
105	Label mylar coated.
106	Roll does not contain 1000 labels.
Minor	
201	Label not clean.
202	Label colors faded or inconsistent.

Dimensional Examination. The identification marker shall be examined for defects in dimensions. Any dimension not within the specifications herein shall be classified as a defect.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices and is suitable for the purpose intended. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
