DATA ITEM DESCRIPTION

Title: Contractor Evaluation of Technical Publications and Recommended Changes

Number: DI-TMSS-81670A
AMSC Number: 7696
DTIC Applicable: No
Office of Primary Responsibility: NS/DA023
Applicable Forms: N/A

Approval Date: 17 JAN 2007
Limitation: N/A
GIDEP Applicable: No

Use/relationship: To obtain information from contractors relative to the adequacy and accuracy of existing technical publications which are intended for use in support of the operation and maintenance of system/equipment(s).

a. This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

b. Provides an evaluation of the technical adequacy of existing technical publications and, as required, recommendations for changes which are considered necessary in order for the subject document(s) to comply with interfacing documentation requirements established by the procurement document.

c. Not authorized for use with Air Force Technical Orders (TOs).

Requirements:

1. Reference Documents: None.

2. Format. Data shall be in the contractor's format.

3. Content.

3.1. Provide an evaluation report for all commercial technical publications, regardless of source or type (i.e. technical manual, handbook, data sheet, etc.) intended for incorporation into the equipment/system technical support material package.

3.2. Include but do not necessarily limit the report to the following information:

a. The contractor's evaluation of the adequacy of text and supporting illustrations (Including schematic diagrams) to provide:

(1) A description of the equipment, its capabilities, and theory of operation.
(2) Procedures necessary to operate the equipment/system in all modes of operation.

Check the source to verify that this is the current version before use.

(3) Instructions for preventive and corrective maintenance, troubleshooting, repair, test alignment, and calibration procedures.
(4) Parts information sufficient to identify and order (from commercial or Government supply sources) failed parts.
(5) Software or firmware descriptions, where required, either through coverage or references to documents that contain pertinent information.
(6) A description of the installation.

b. The contractor's recommended change actions.
c. Other information to support the evaluation.

3.3. The report for each revised document shall provide the following information:

a. The equipment/system contractor's name.
b. The contract number and date of the report.
c. Identity of the reviewing activity and the as of date of the review.
d. Vendor or supplier identification.
e. Complete equipment nomenclature including part, model, and/or serial number.
f. Title of the document, publication reorder number, and date of issue.
g. Price and availability of the date and the quantity required.

4. END OF DI-TMSS-81670A
