MS36514-1	200-1200	....	Cone to Ring	50
MS36514-2	0-6000 0-333	1/4	Two position gear	100
MS36514-3	0-1600	....	Direct	35
MS36514-4	10-100	1/30	Gear	...

MATERIAL: The material used in the fabrication of variable speed electric laboratory stirrers shall be durable and of the quality normally used by the manufacturer in his standard commercial items. The electrical wiring shall conform to all the requirements of the Underwriters Laboratory, Code Number UL73.

DESIGN: The stirrer shall be so designed that it may be varied in mixing speed by either electrical or mechanical methods. The stirrer shall consist of a speed control device, a motor with a chuck or other clamping arrangement which can support one or more stainless steel propeller shaves and propellers. The assembly may have its own mounting stand or an arm that can be attached to a laboratory stand. Power requirements - 115V/50-60Hz.

NOTES: 1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

APPROVED 30 APR 1982 REVISED

USER ACTIVITIES: ARMY - MD, DM
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
NAVY - OS
AIR FORCE - 03

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
